

(Campy sitcom intro music - zoom in. 3 sec.)

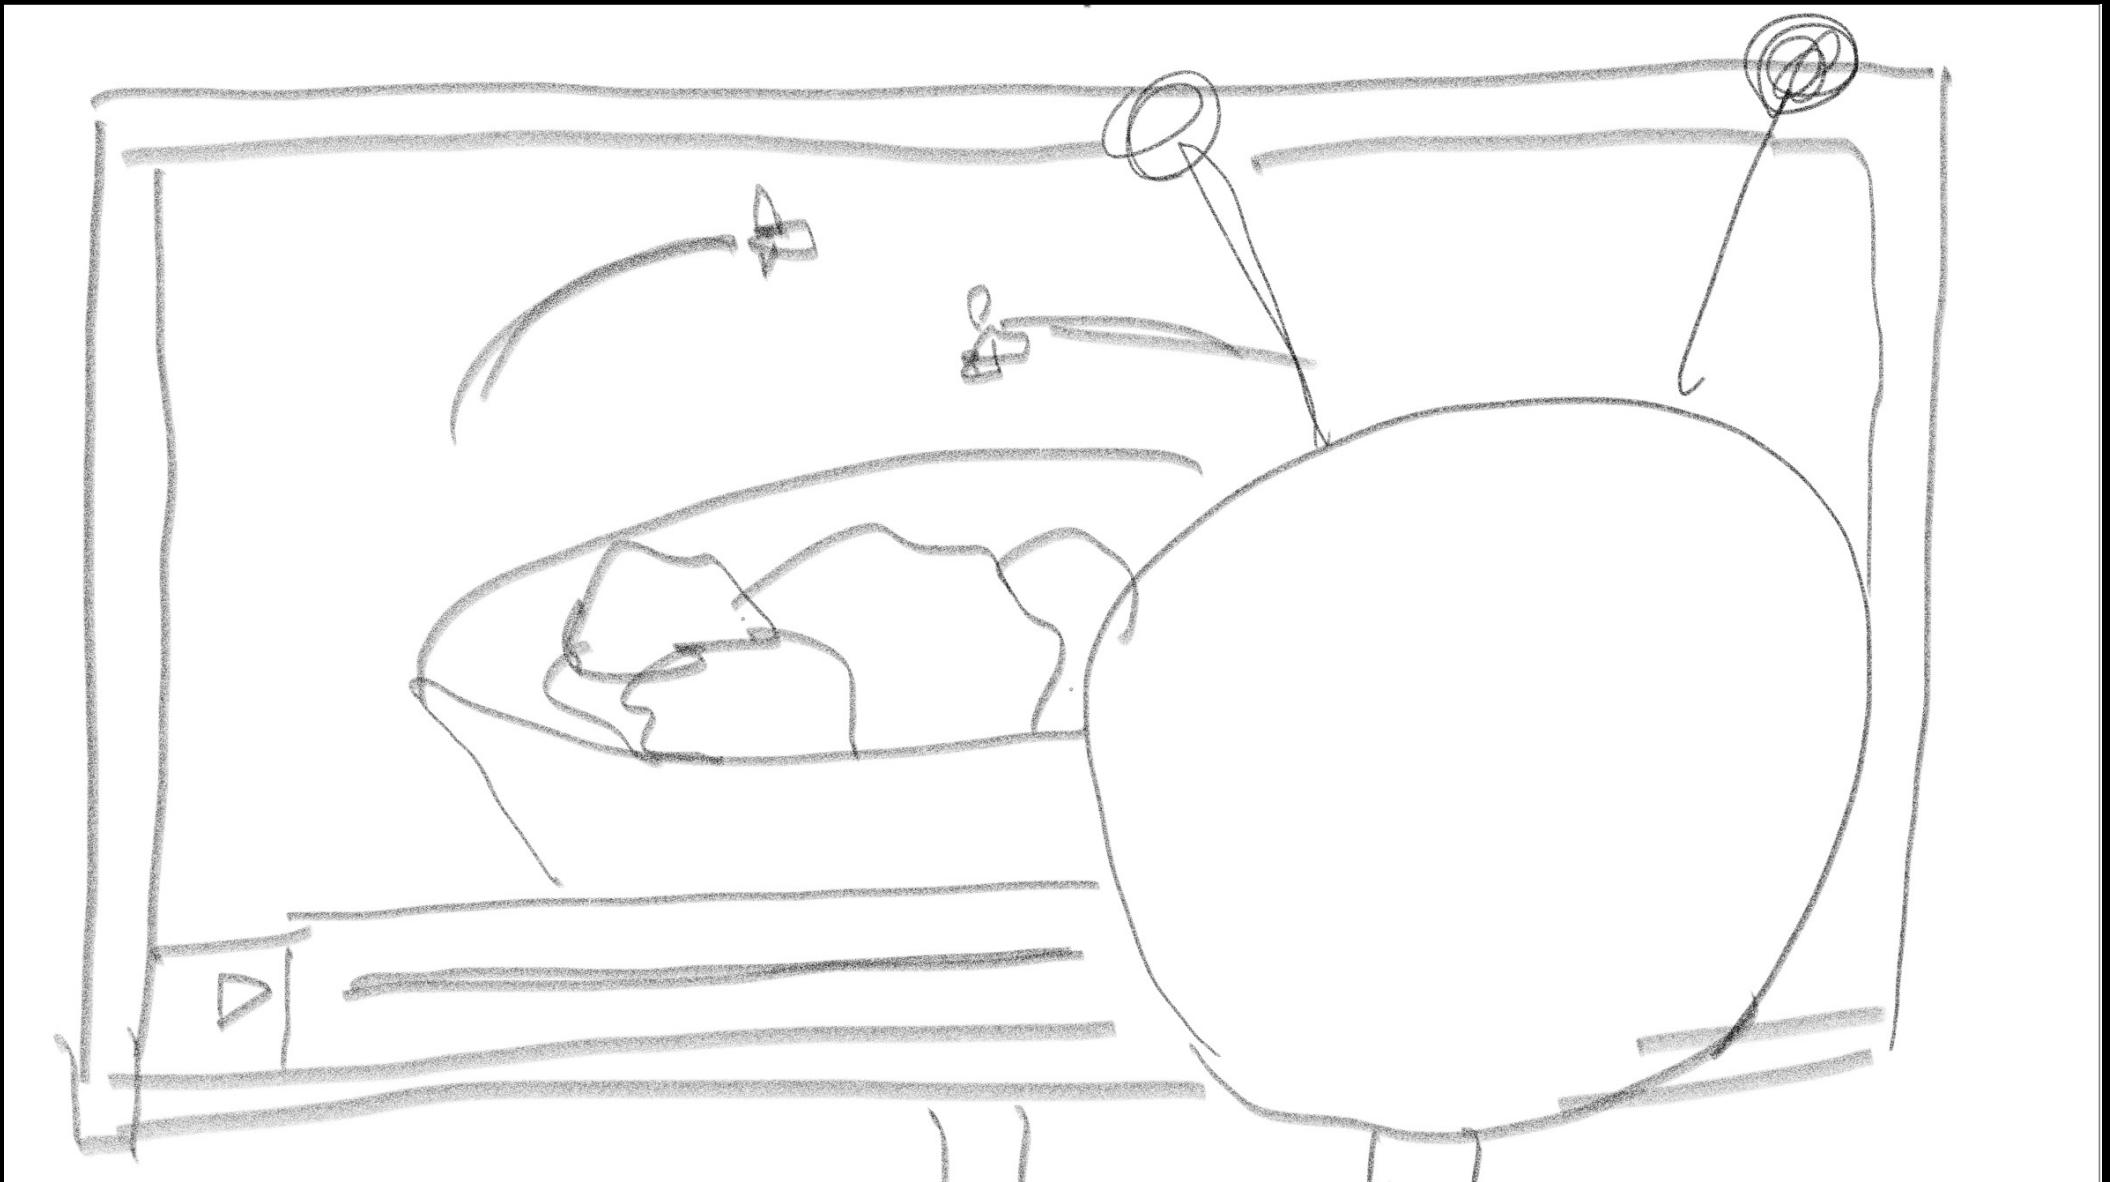

(Last 5 seconds of all-hands meeting about security)

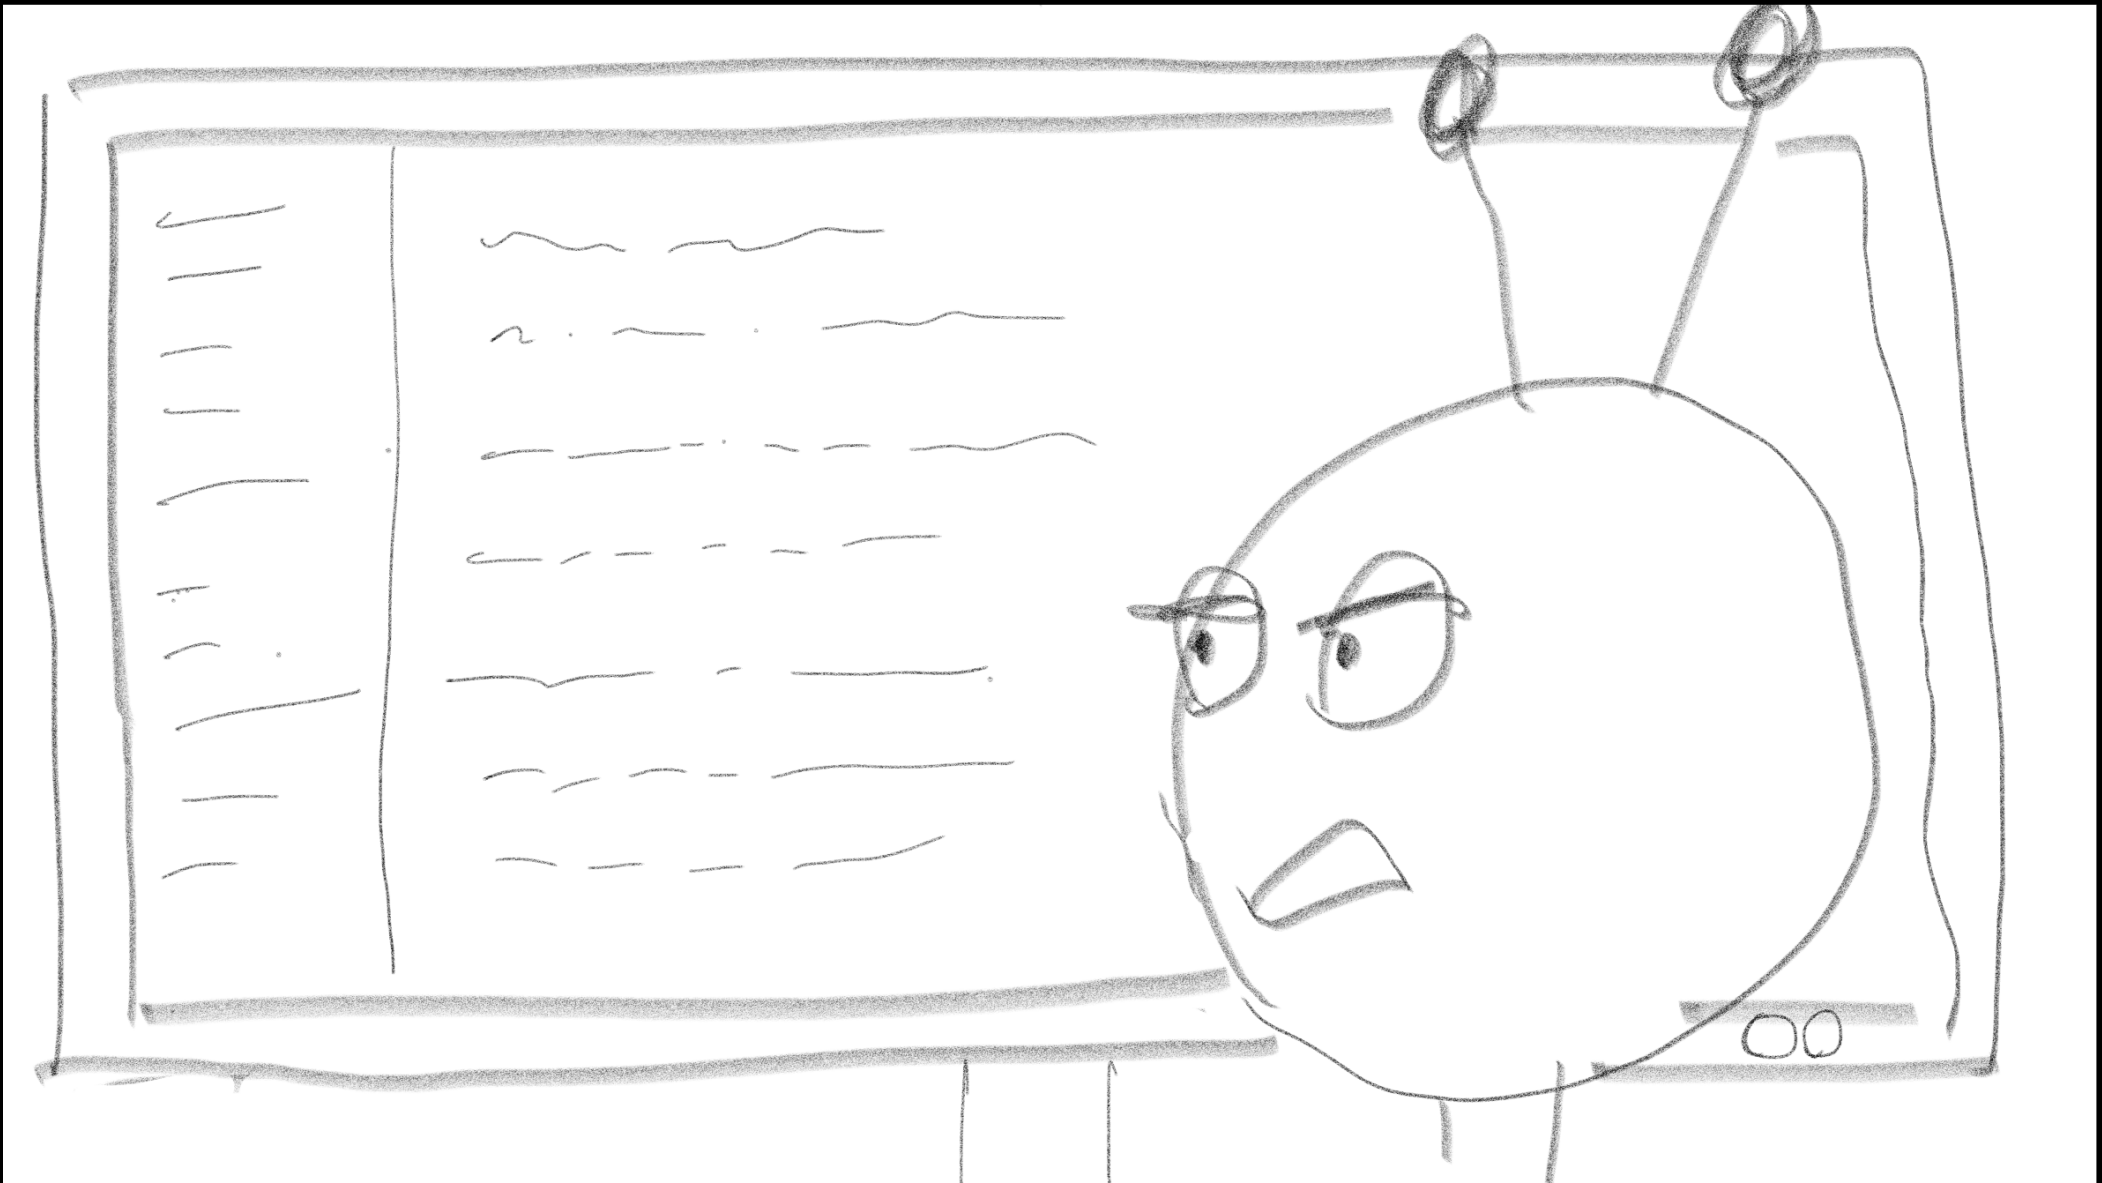

Manager: Happy Friday—and remember... (management slogan that falls flat)

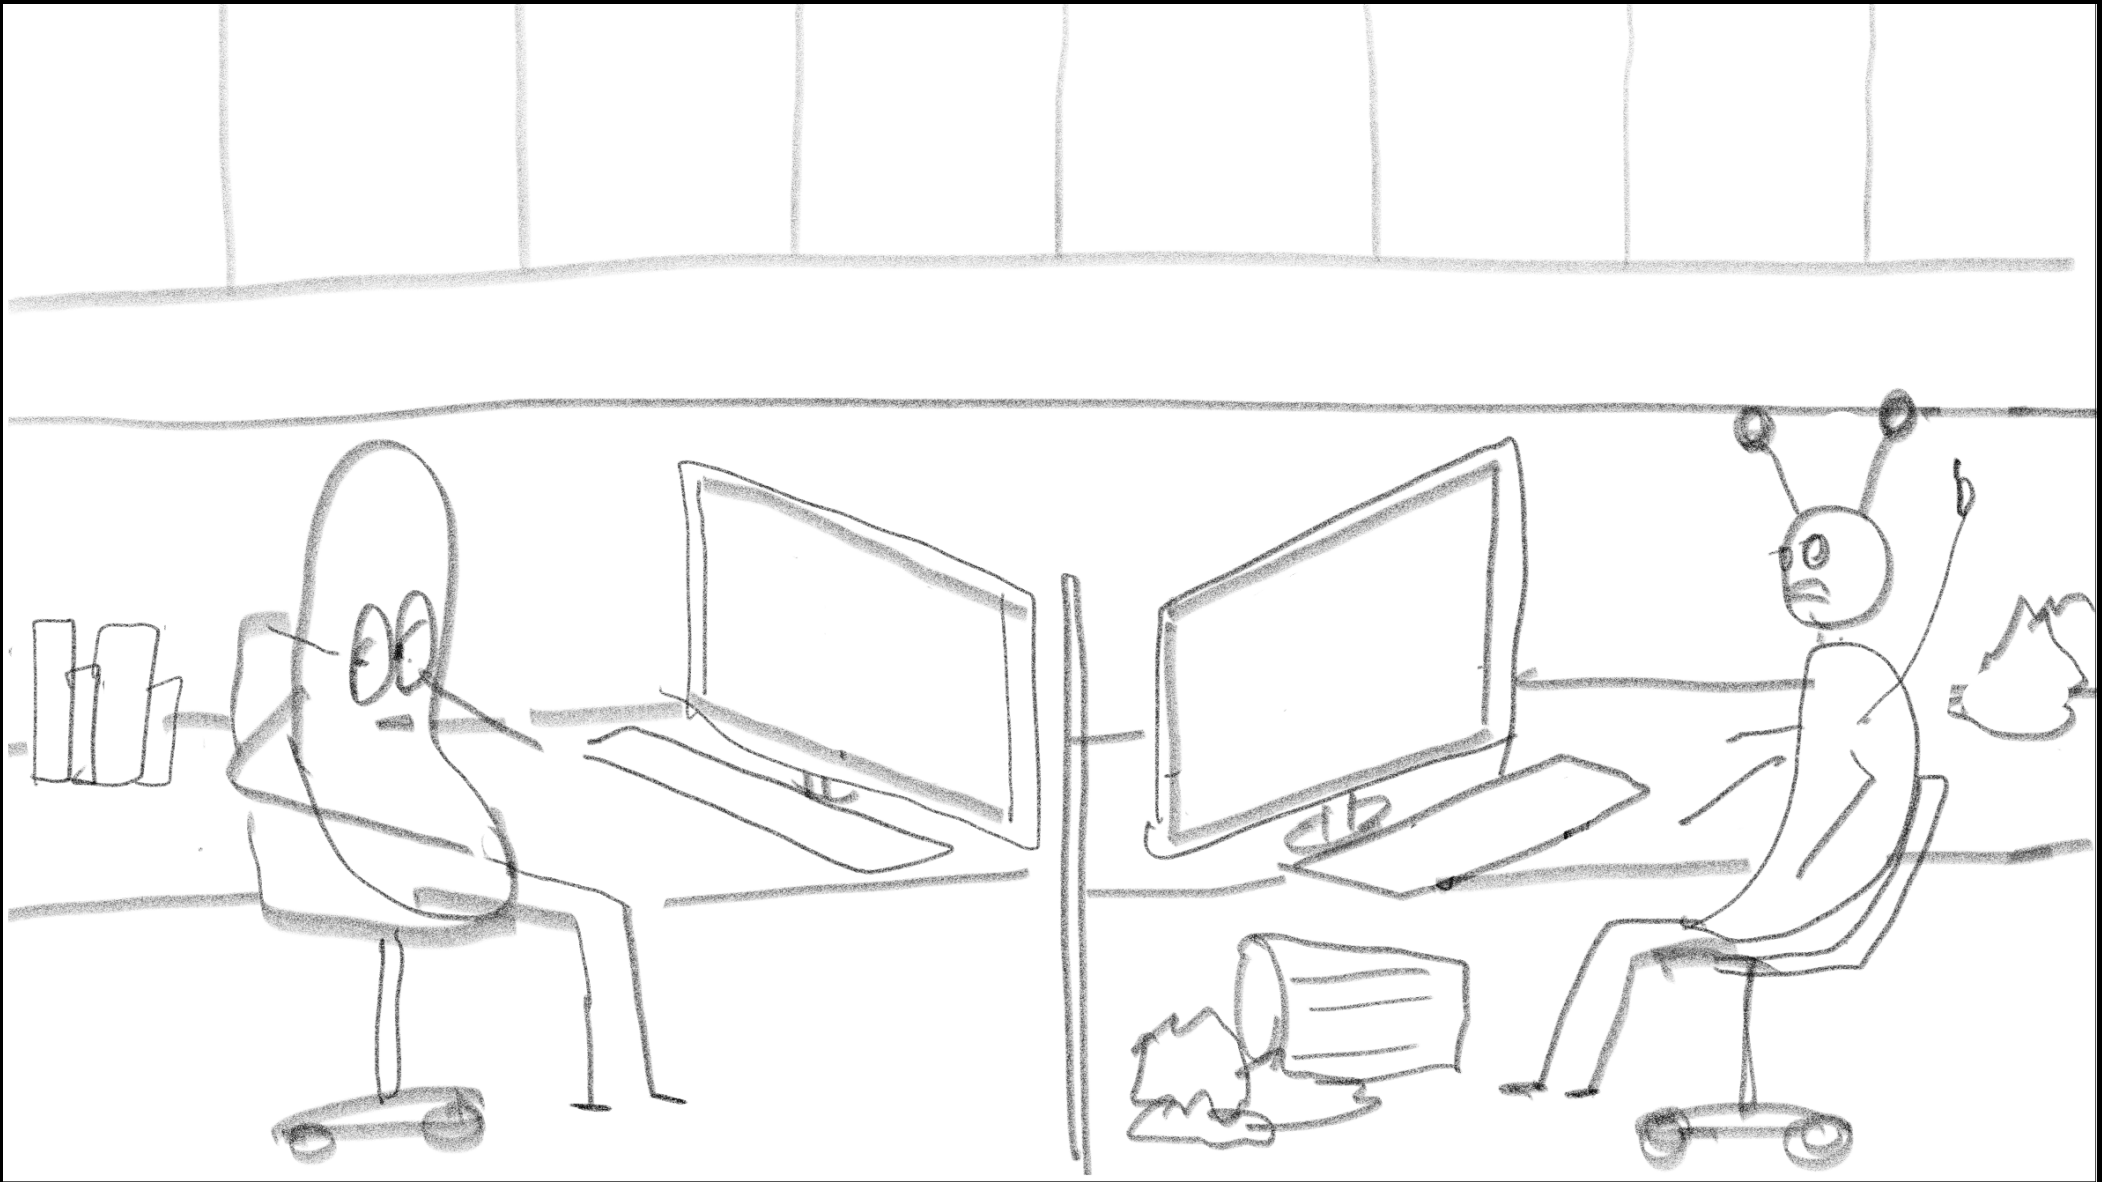

Cookie: Meeting's over. Time to turn off the Trash Cam.

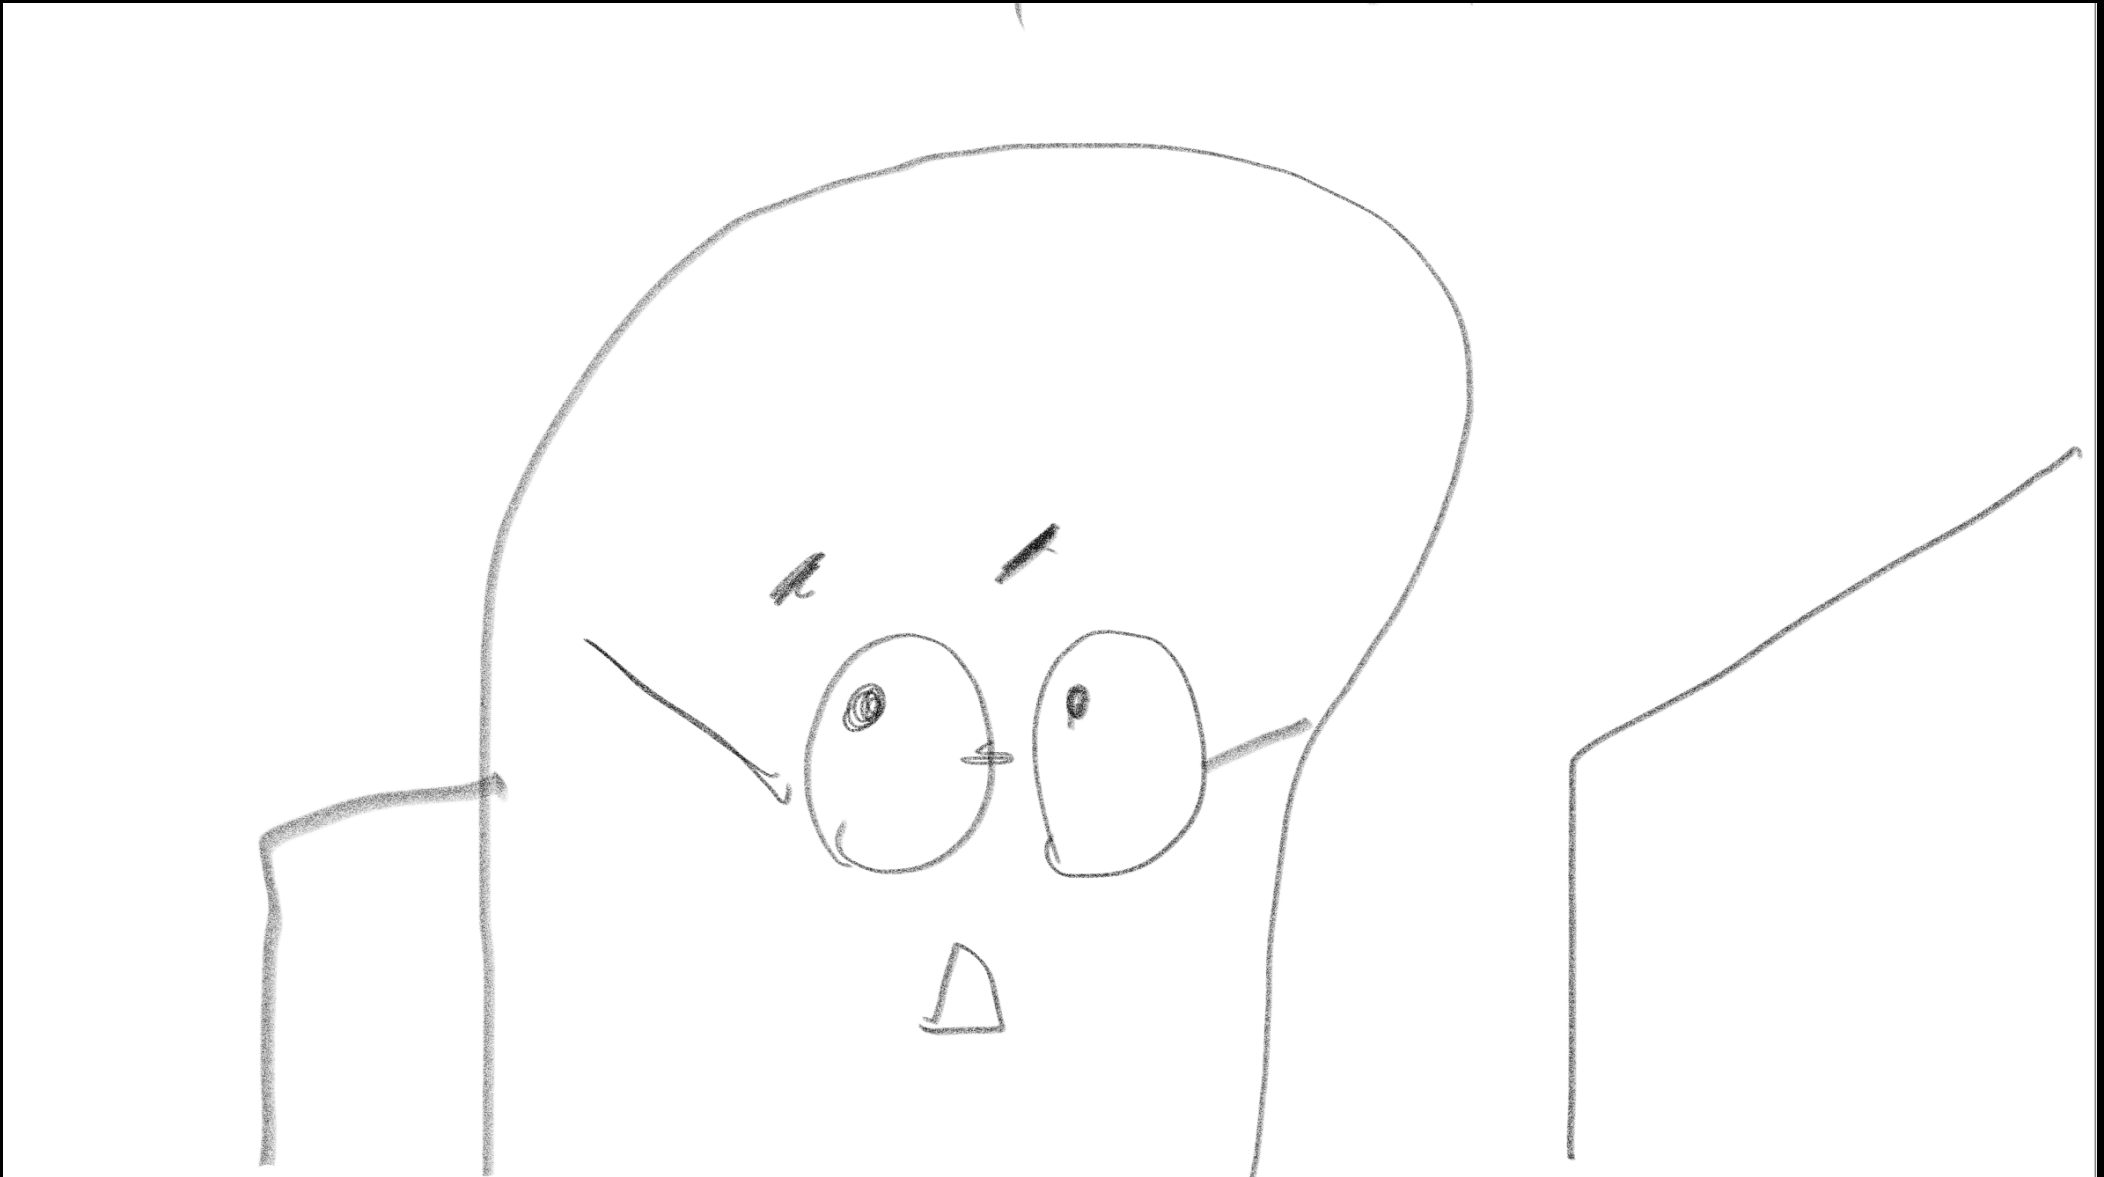

Bug: (embarrassed, quickly closes)

Bug: What a waste of time!

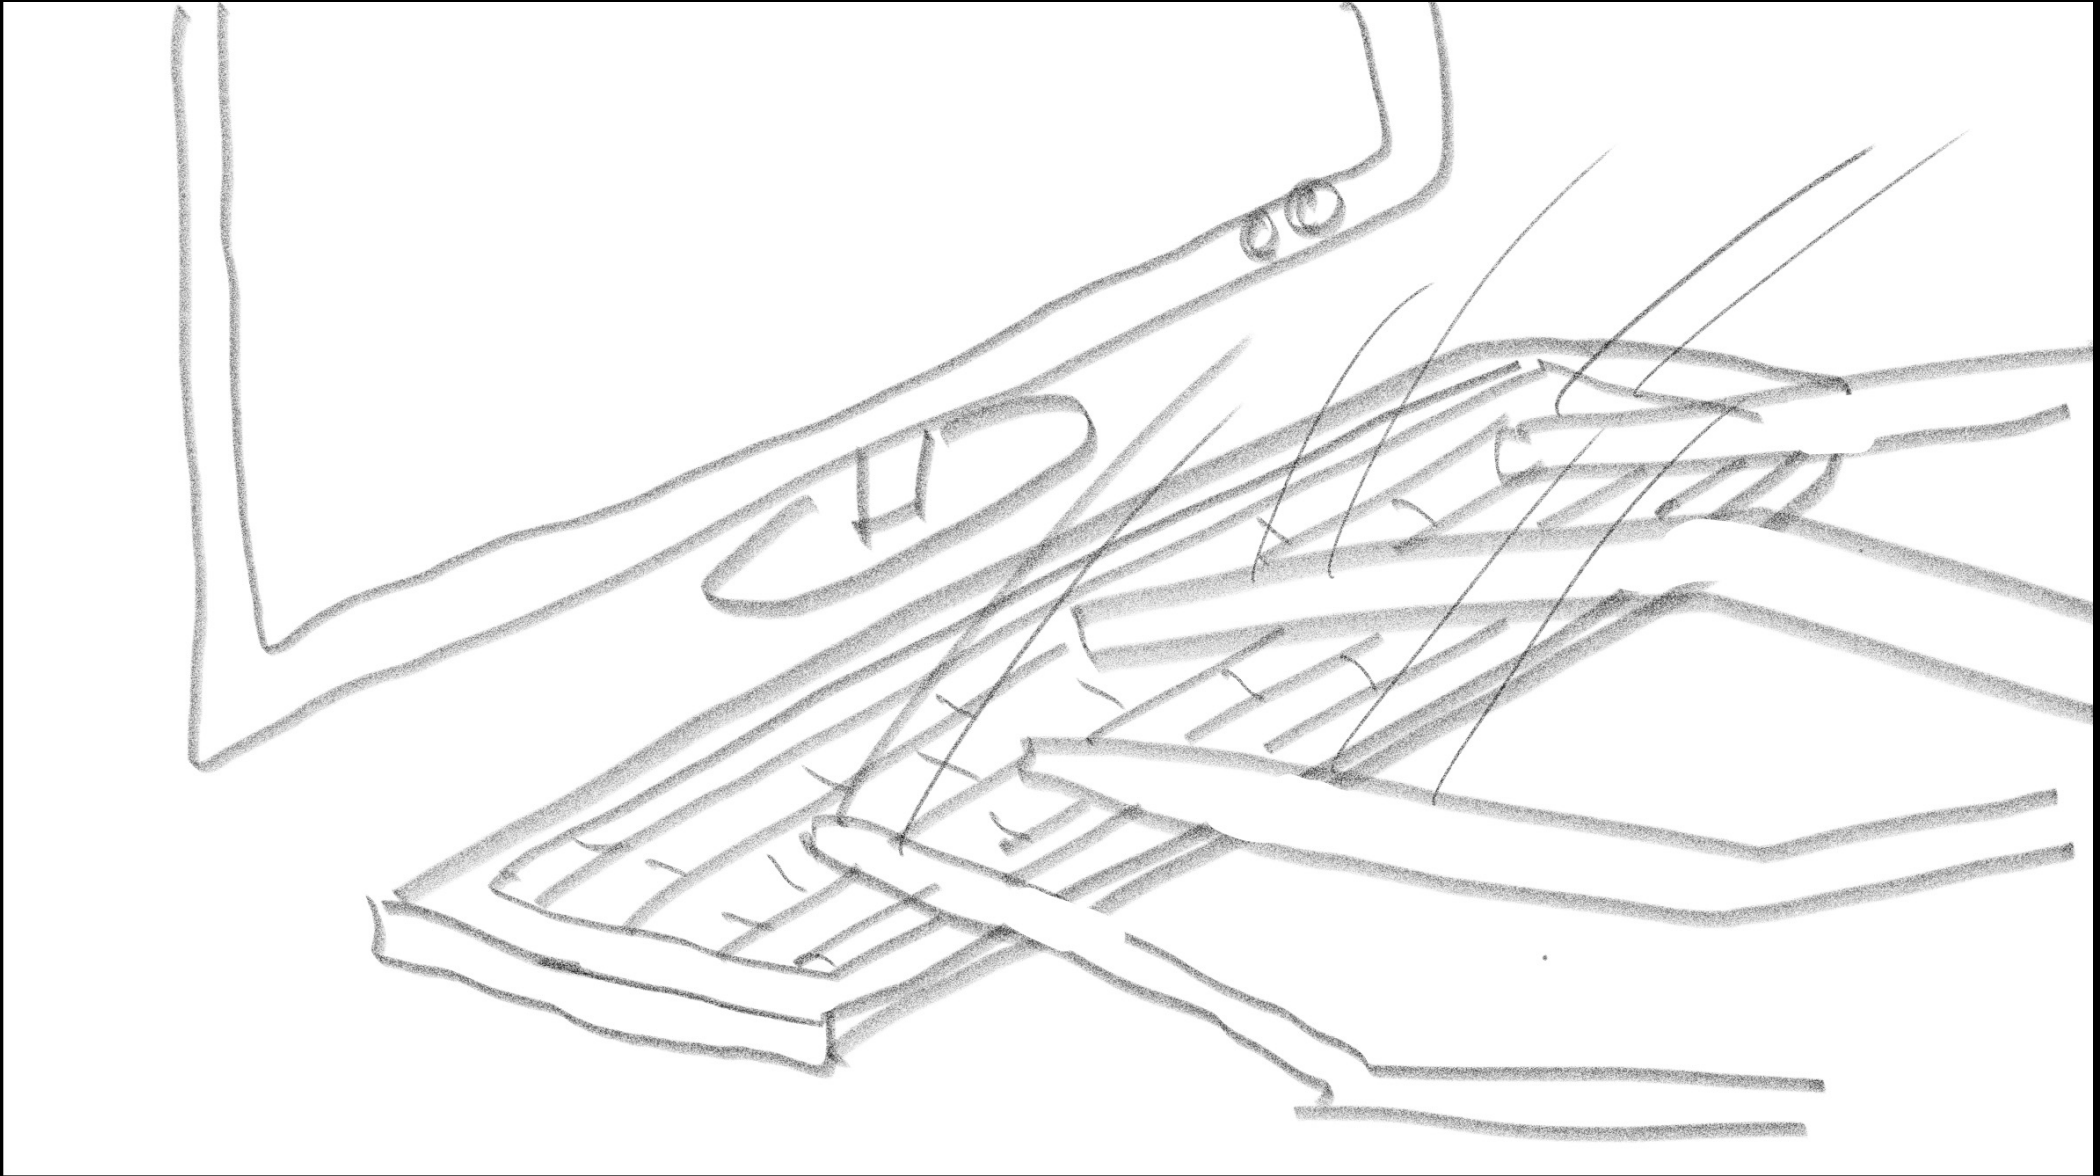

Bug: ...with what I'm working on? (name of project) will revolutionize the market.

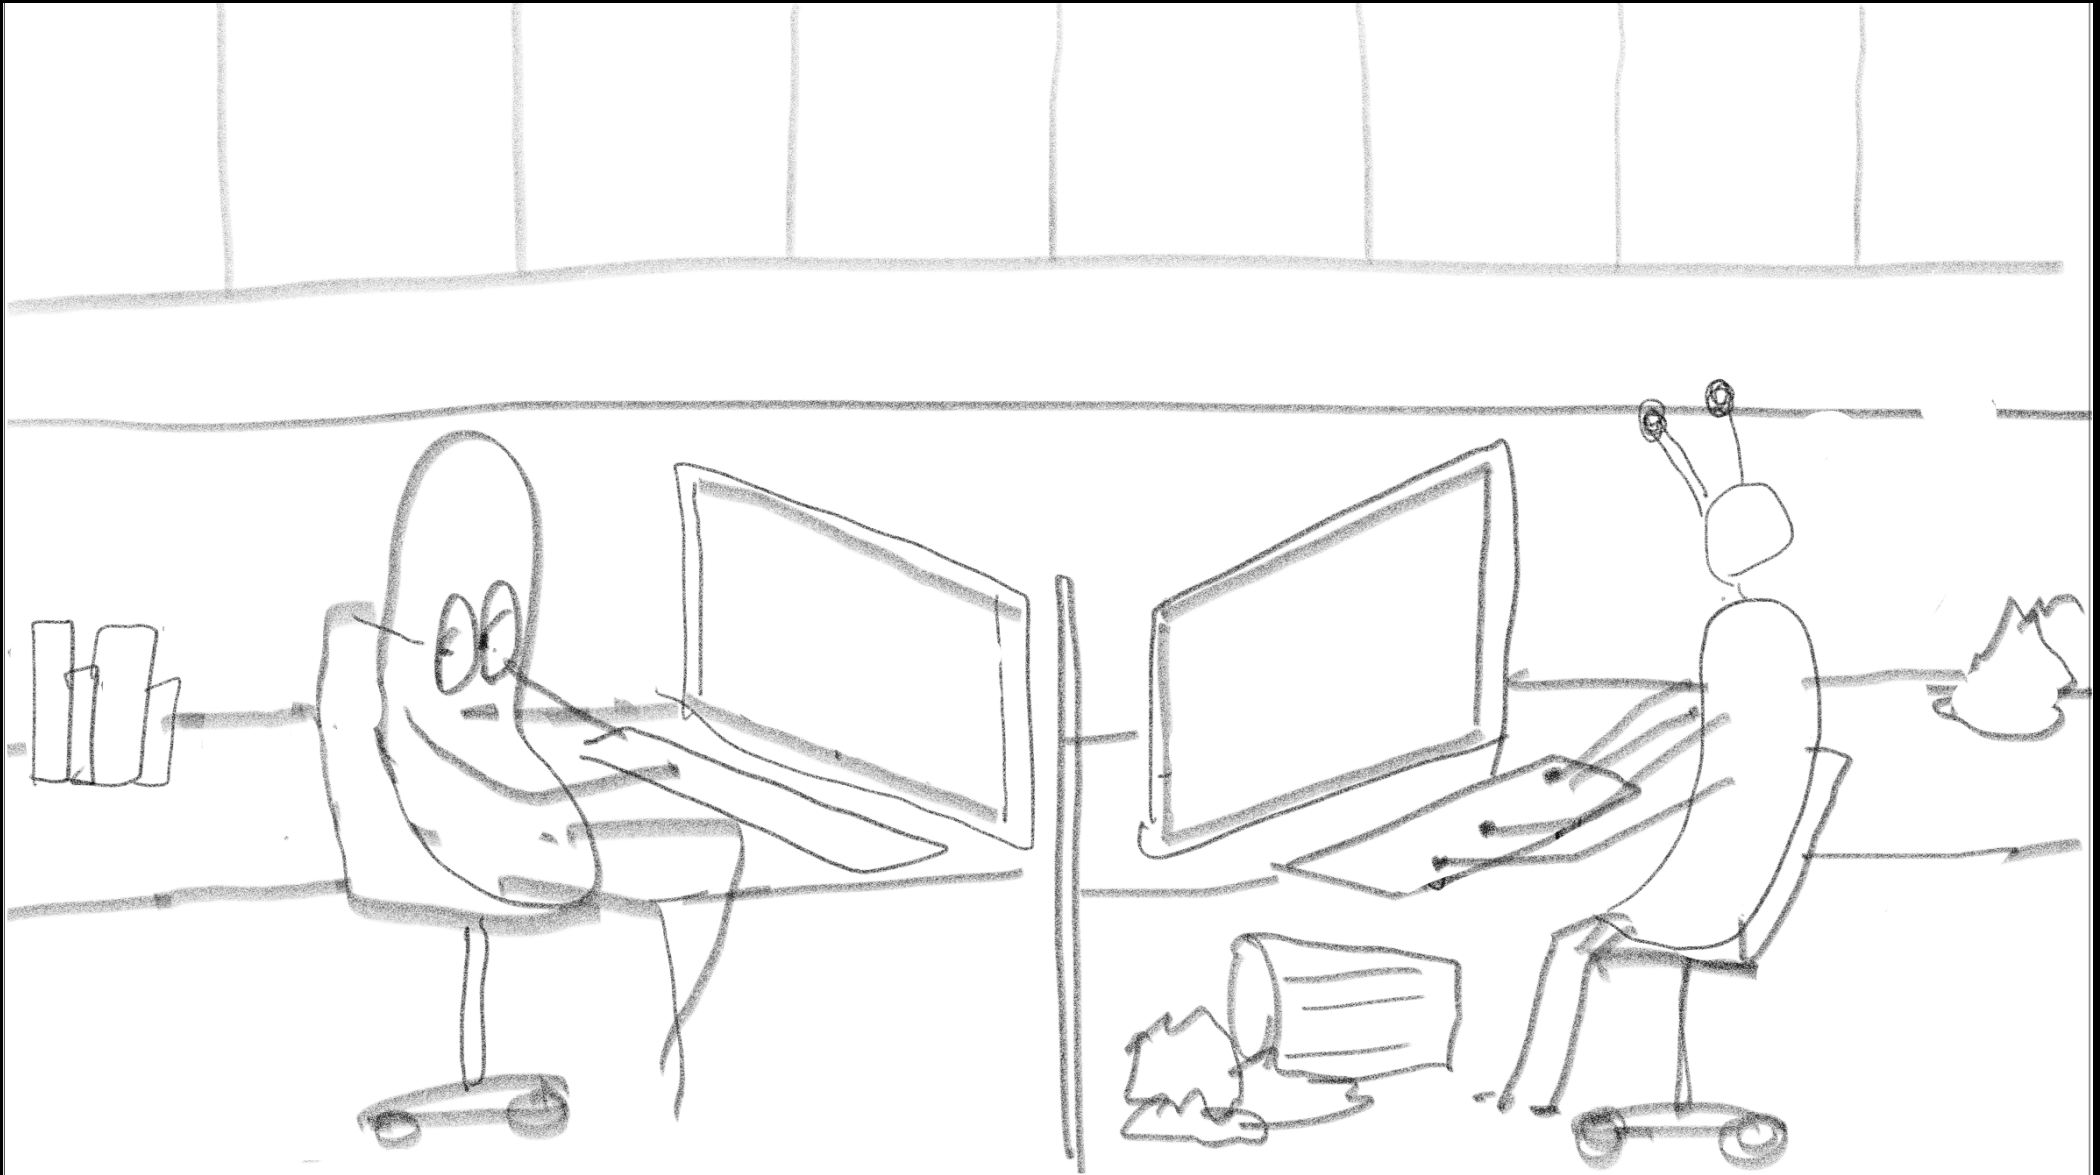

Cookie: Yeah, (mundane feature) is really going to save the world.

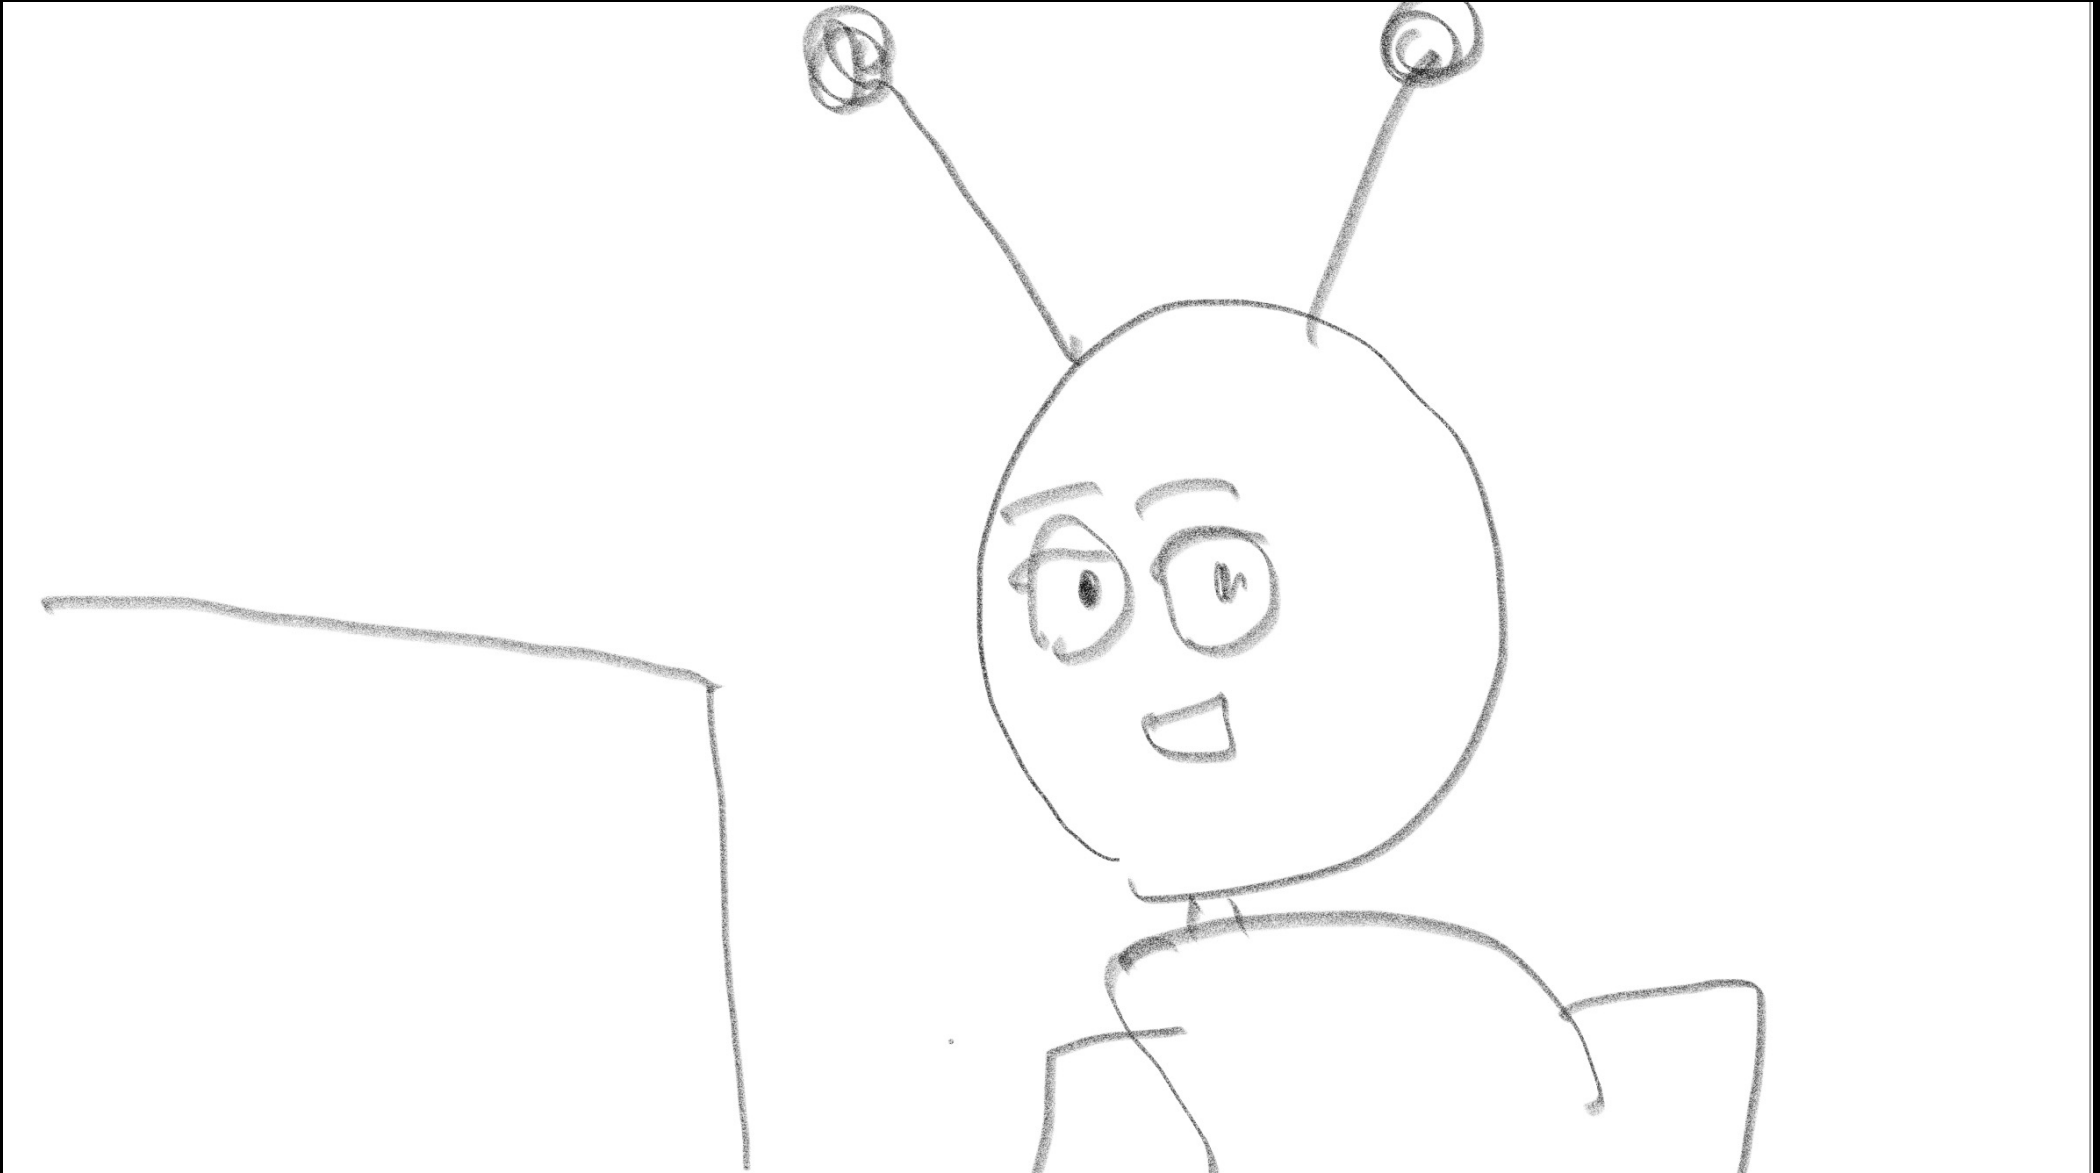

(Quick pan to app poster on wall)

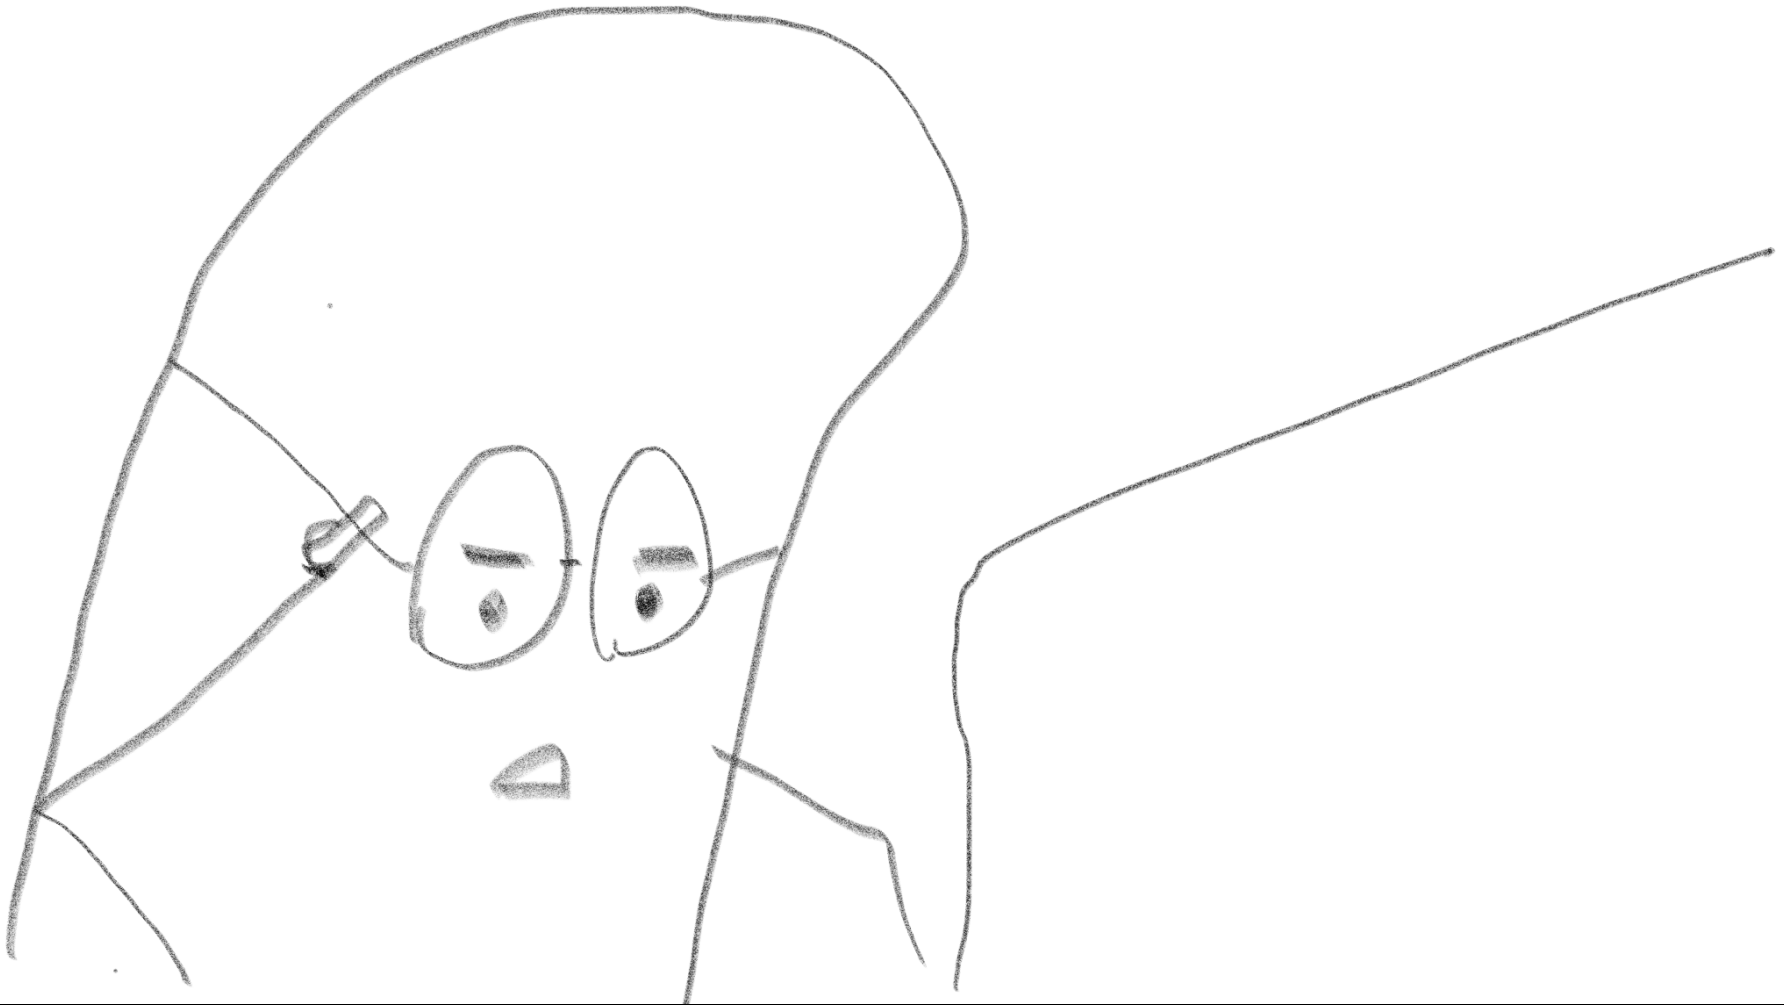

(Bug starts rapid-fire coding)

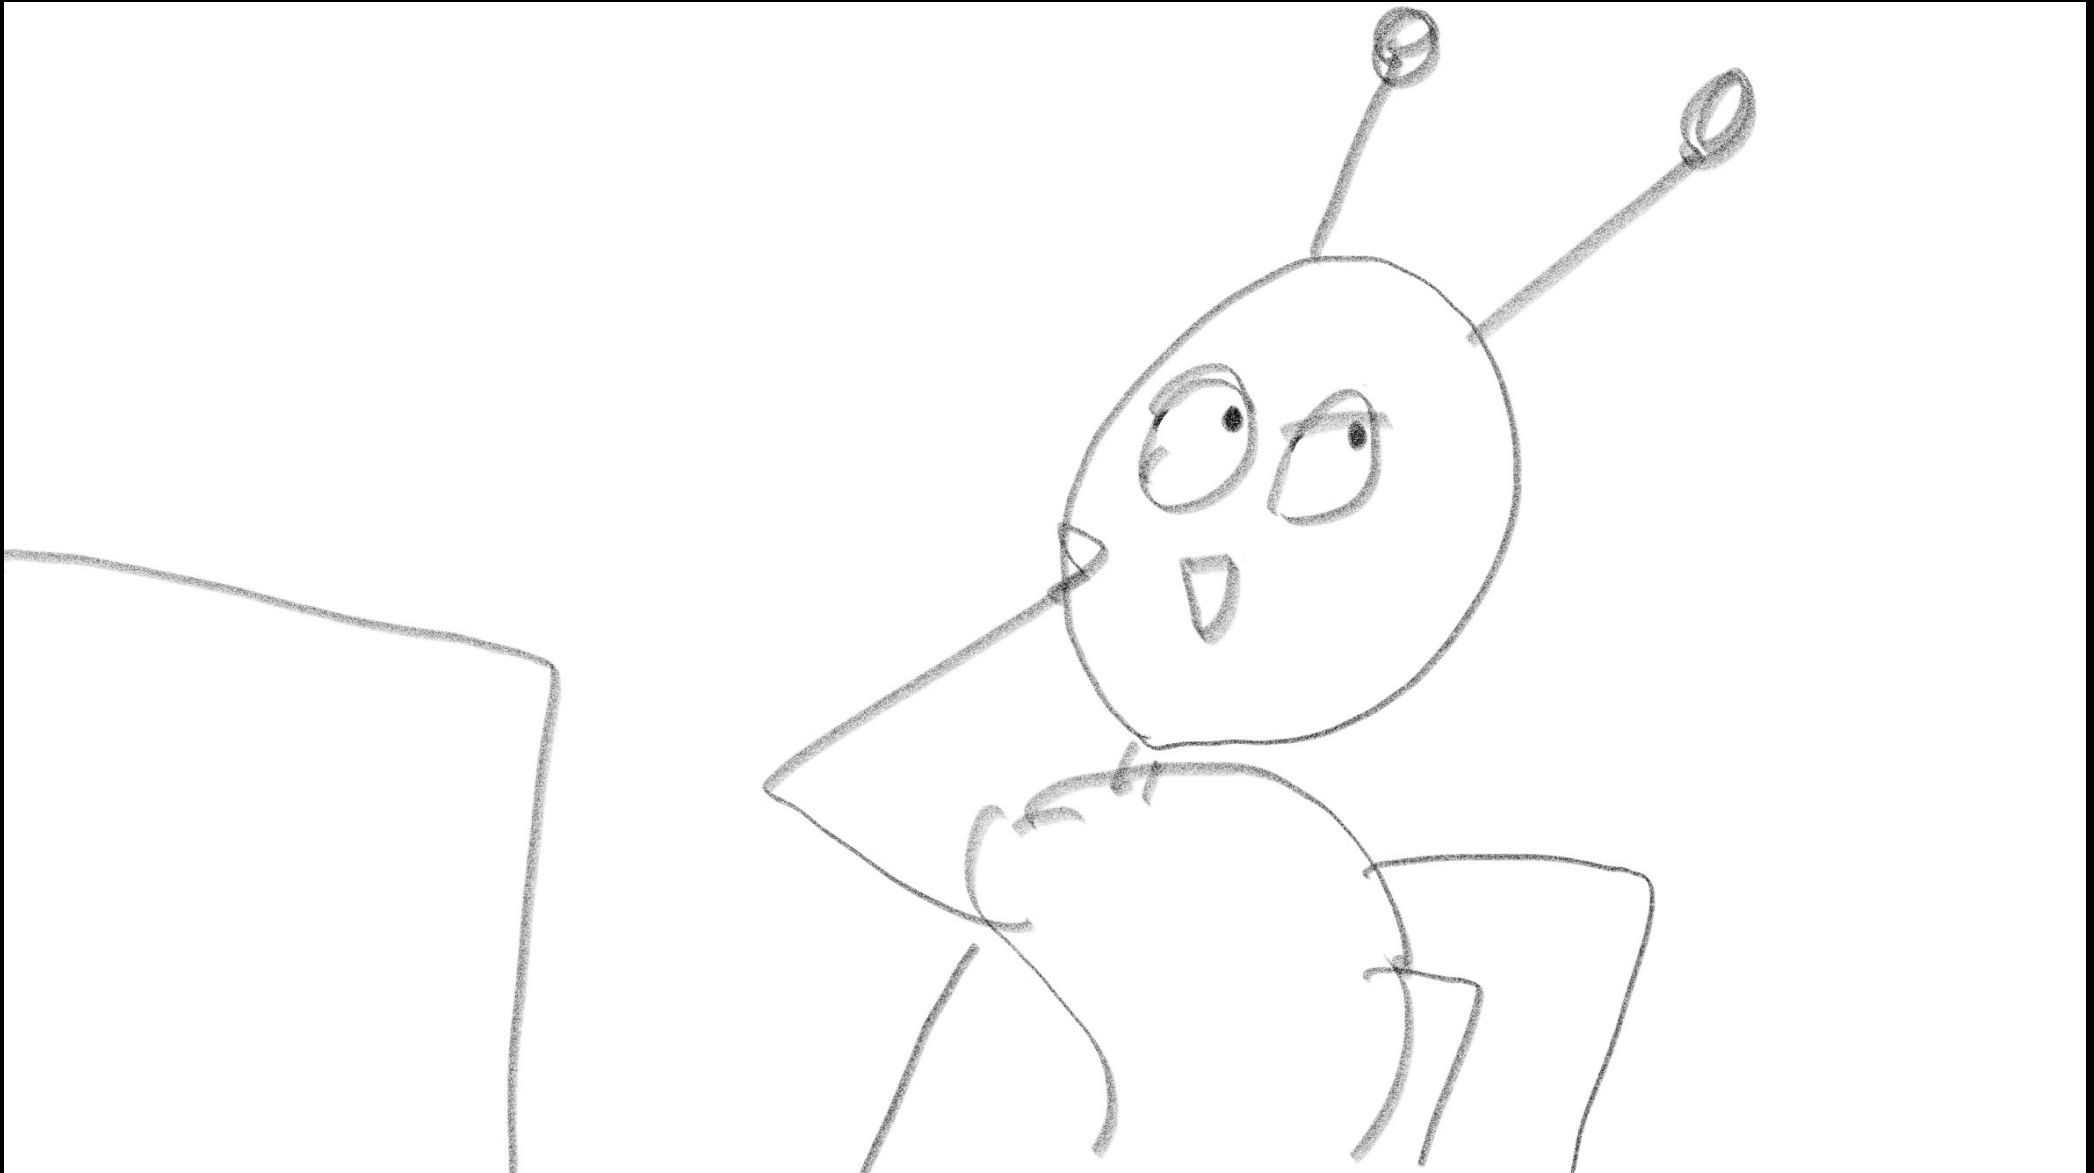

(Both working)

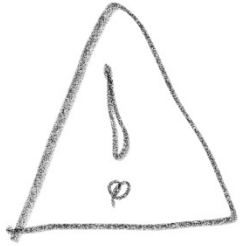

Bug: Hey Cookie, check out this block!

Cookie: This doesn't look right. How did you do this?

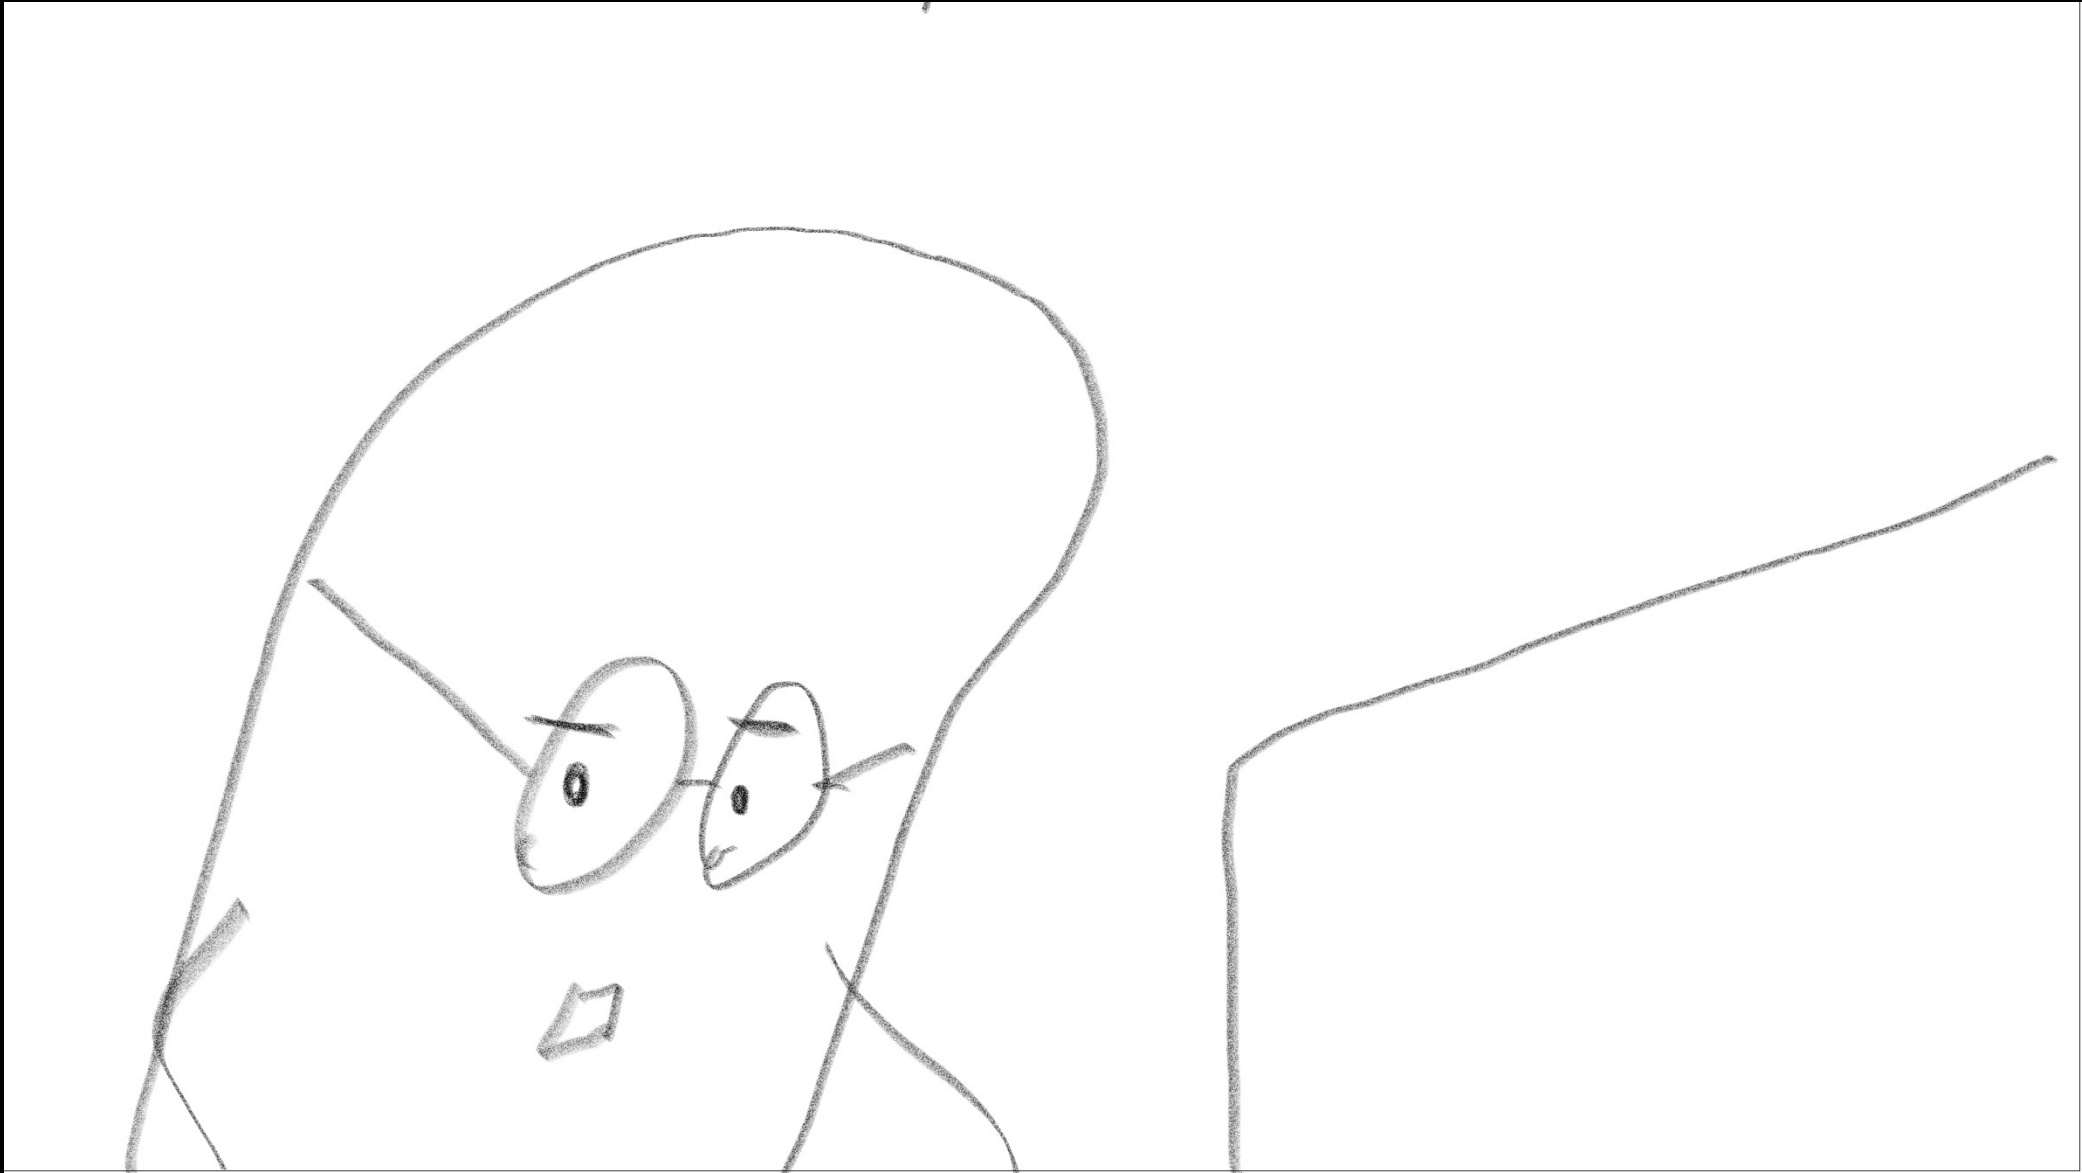

Bug: Oh...I just merged my own pull request
(last night when I had a moment of genius)

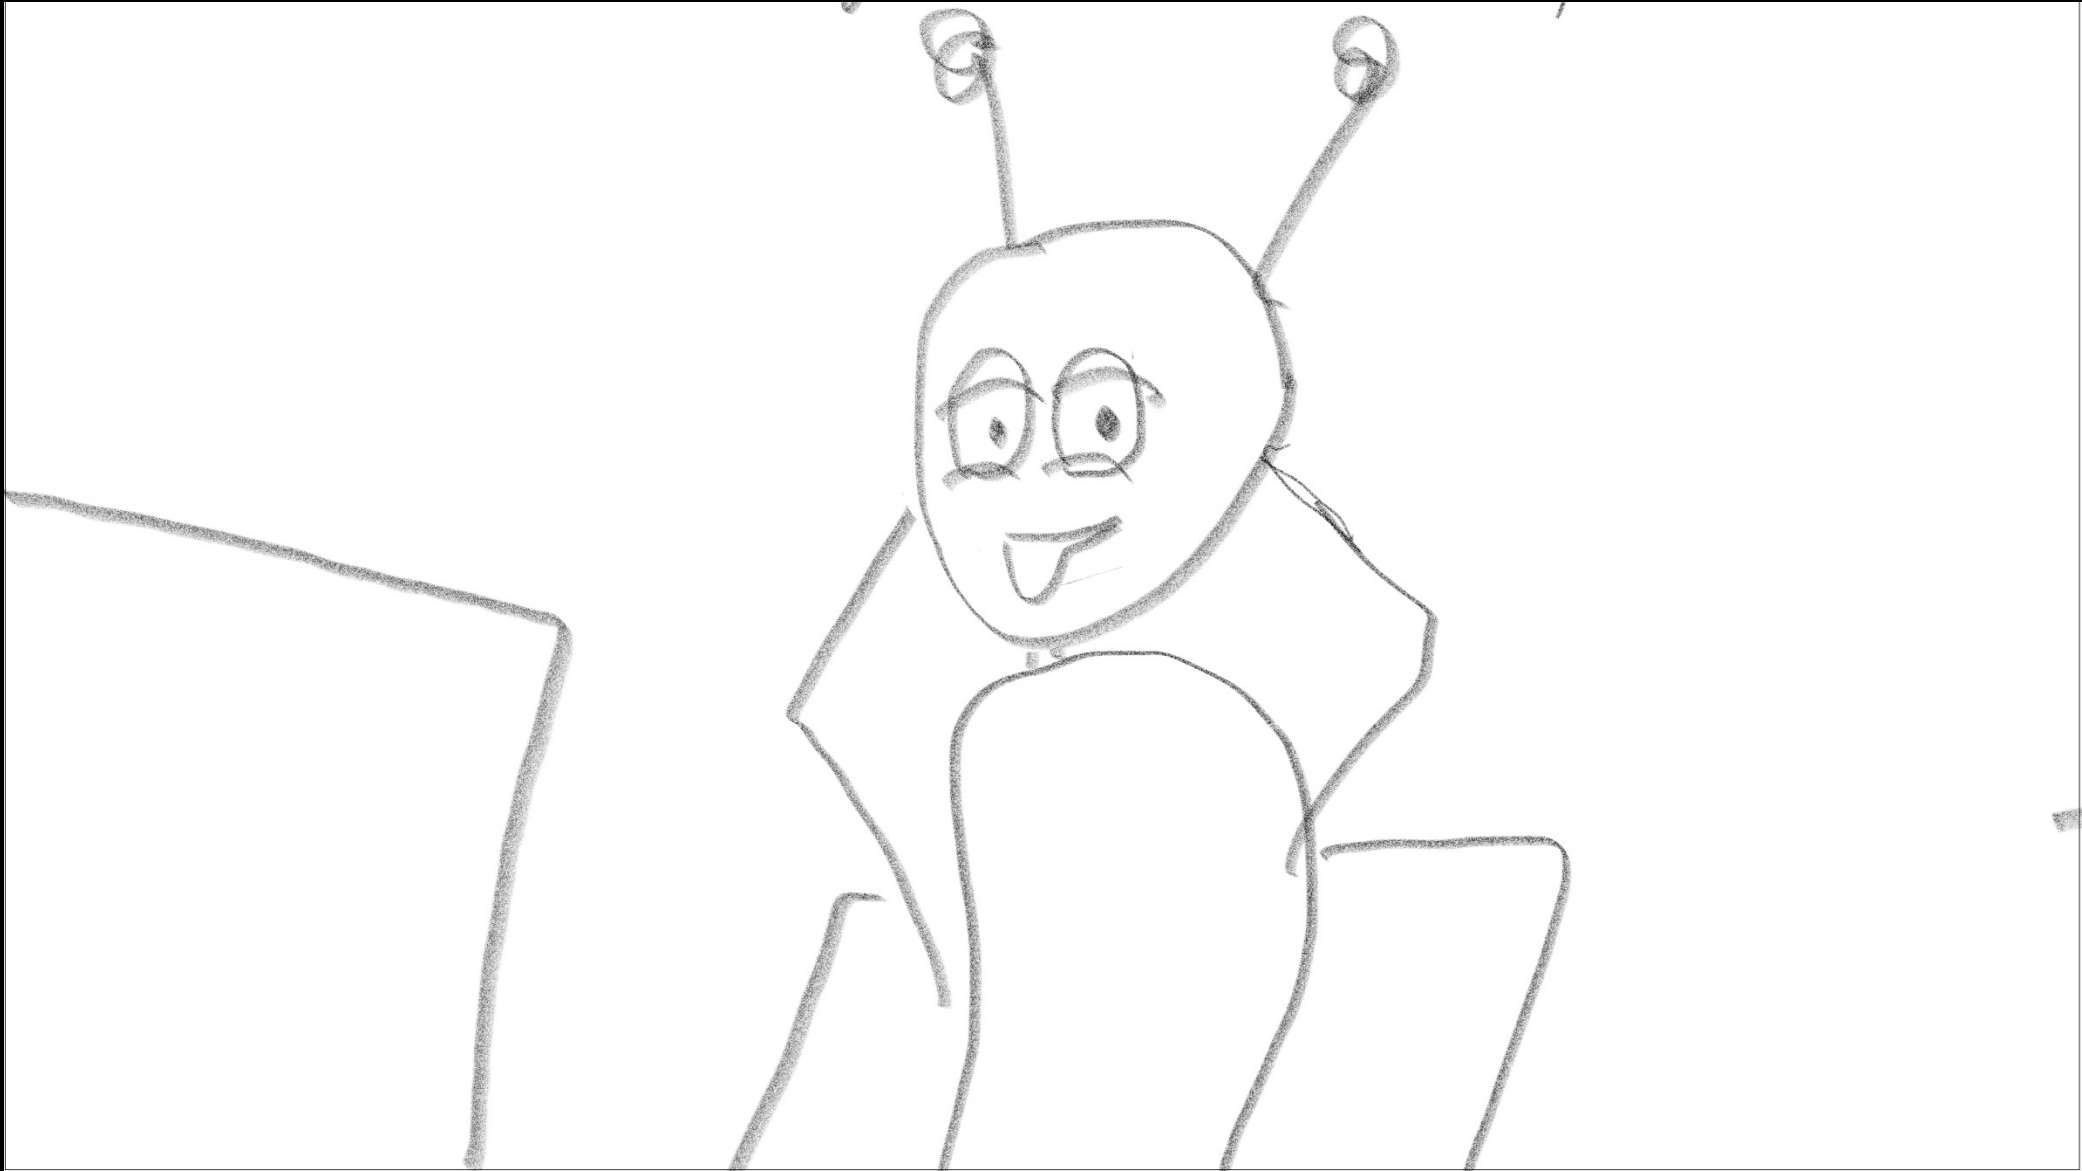

Potential data breach
in S3 bucket.

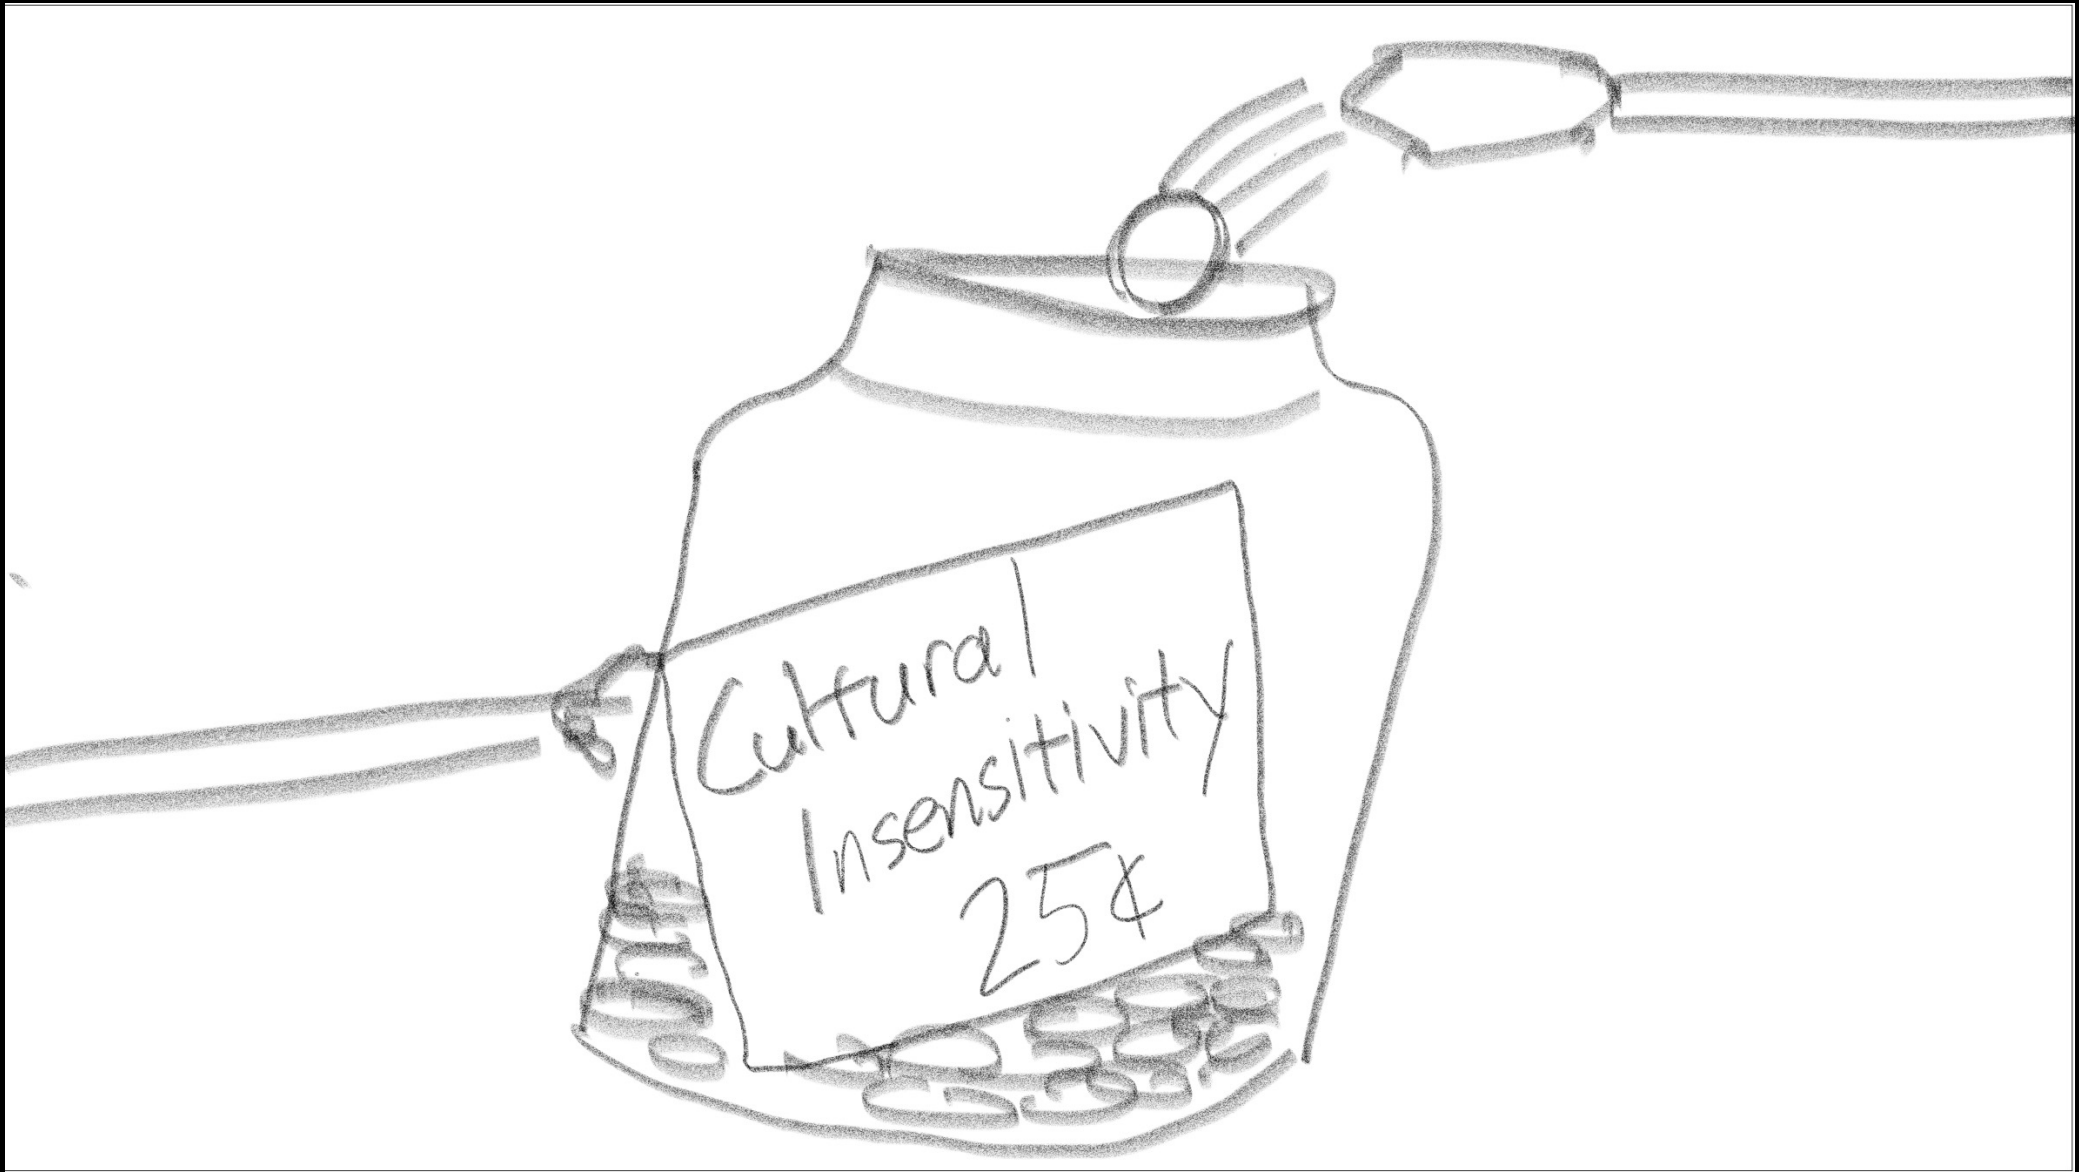

(Cookie sees alert)

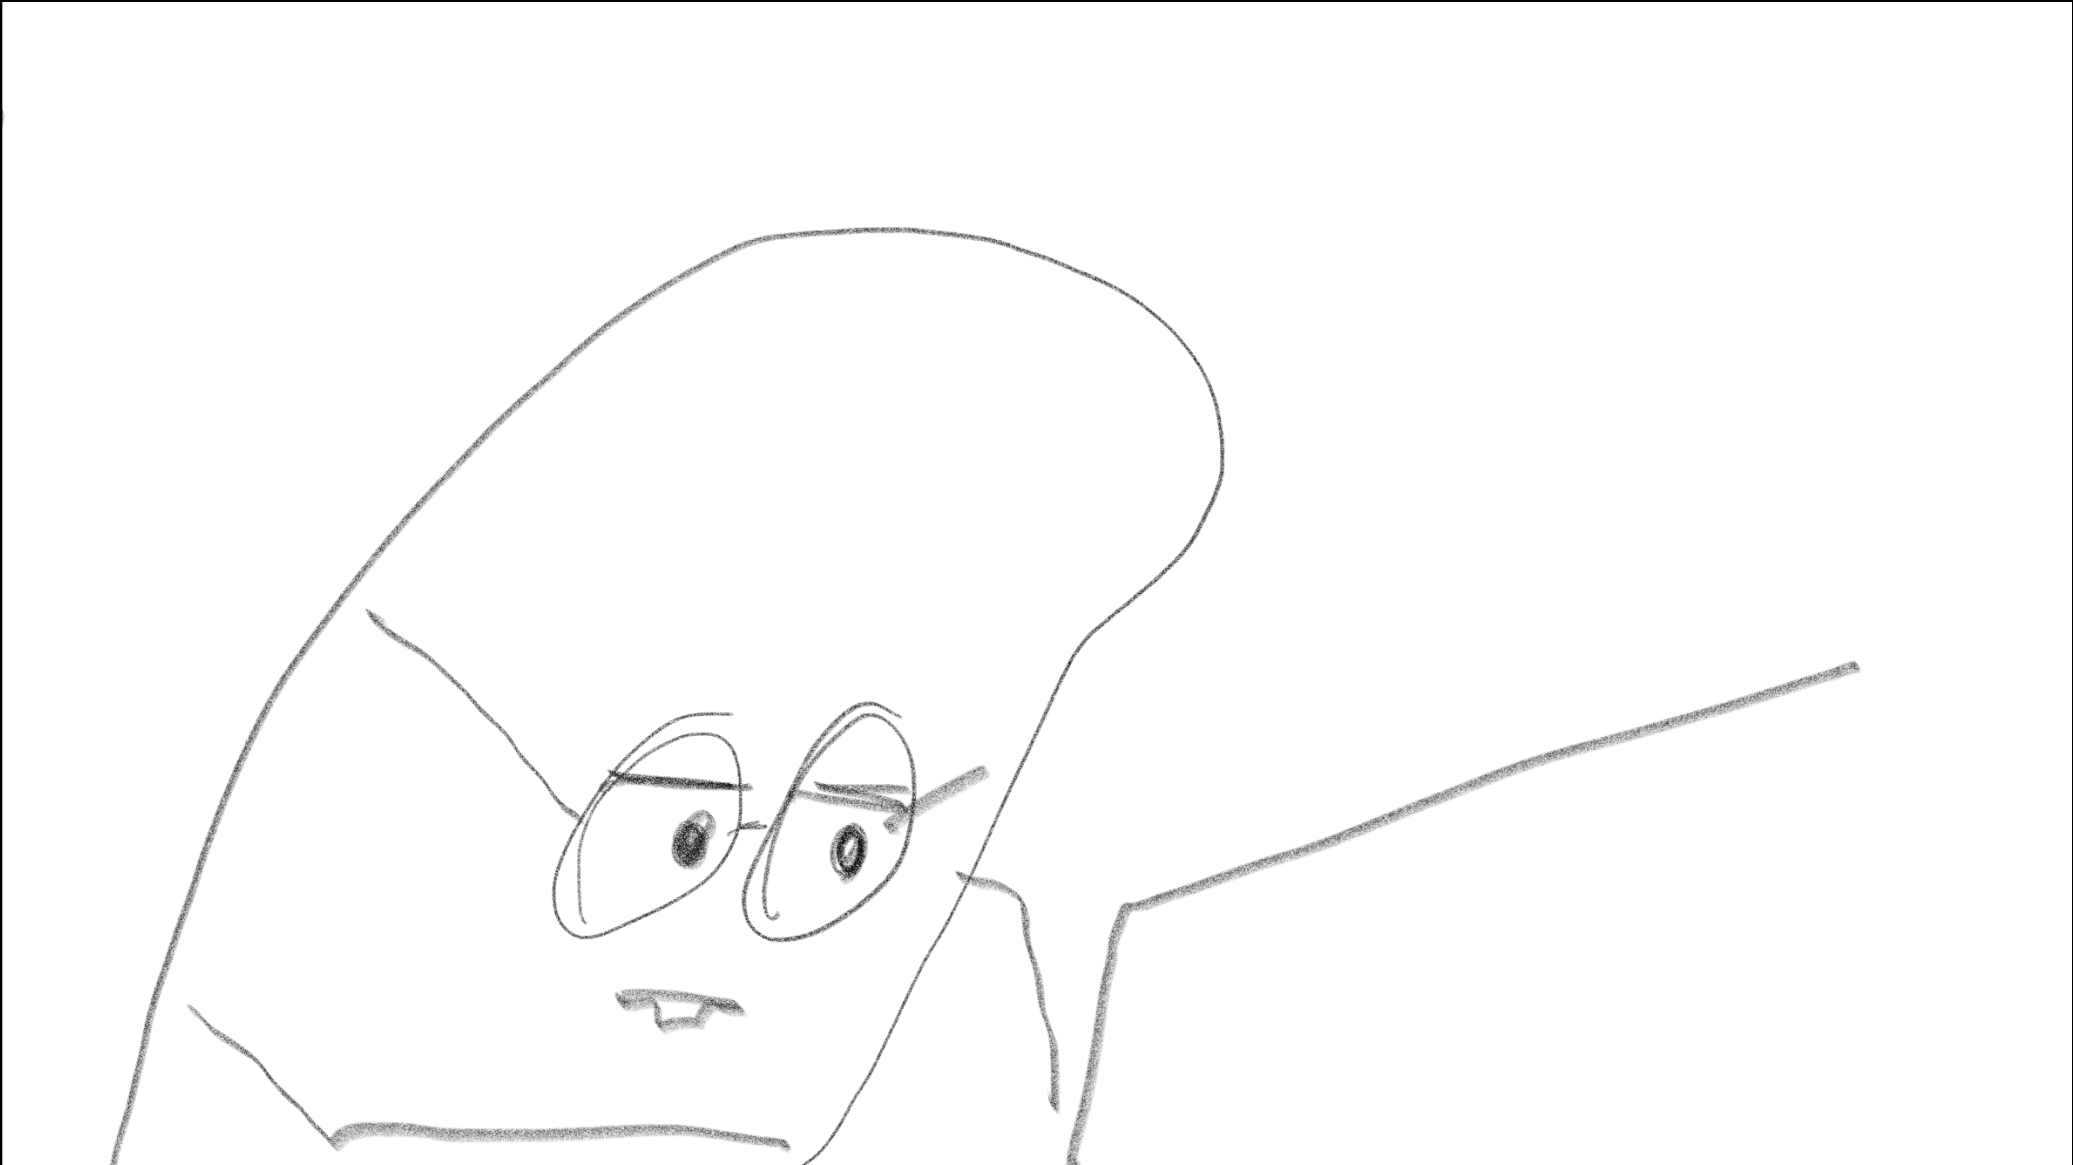

Cookie: Did you use Checkov?

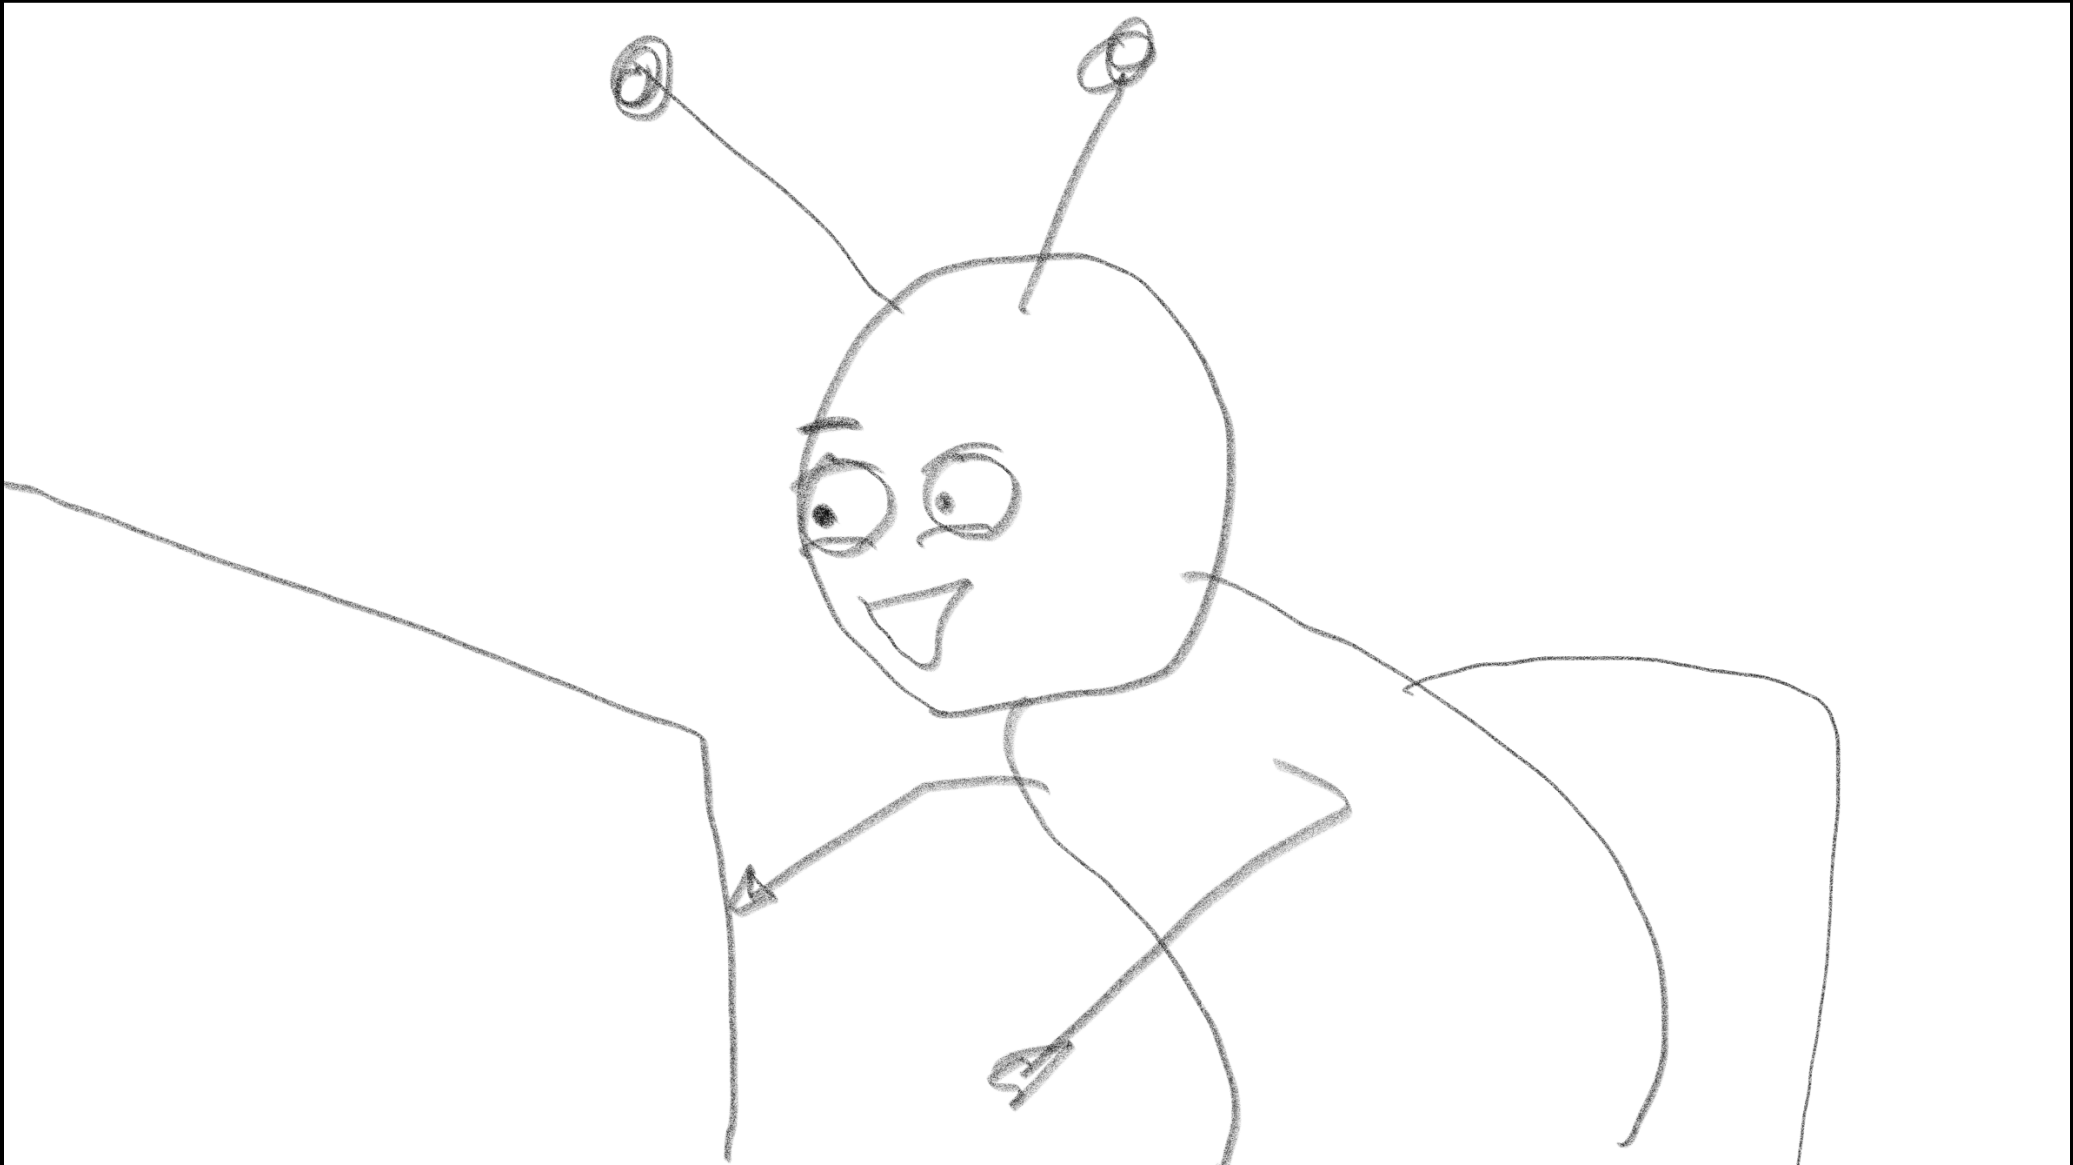

Bug: Nyet, captain. It just slows me down.

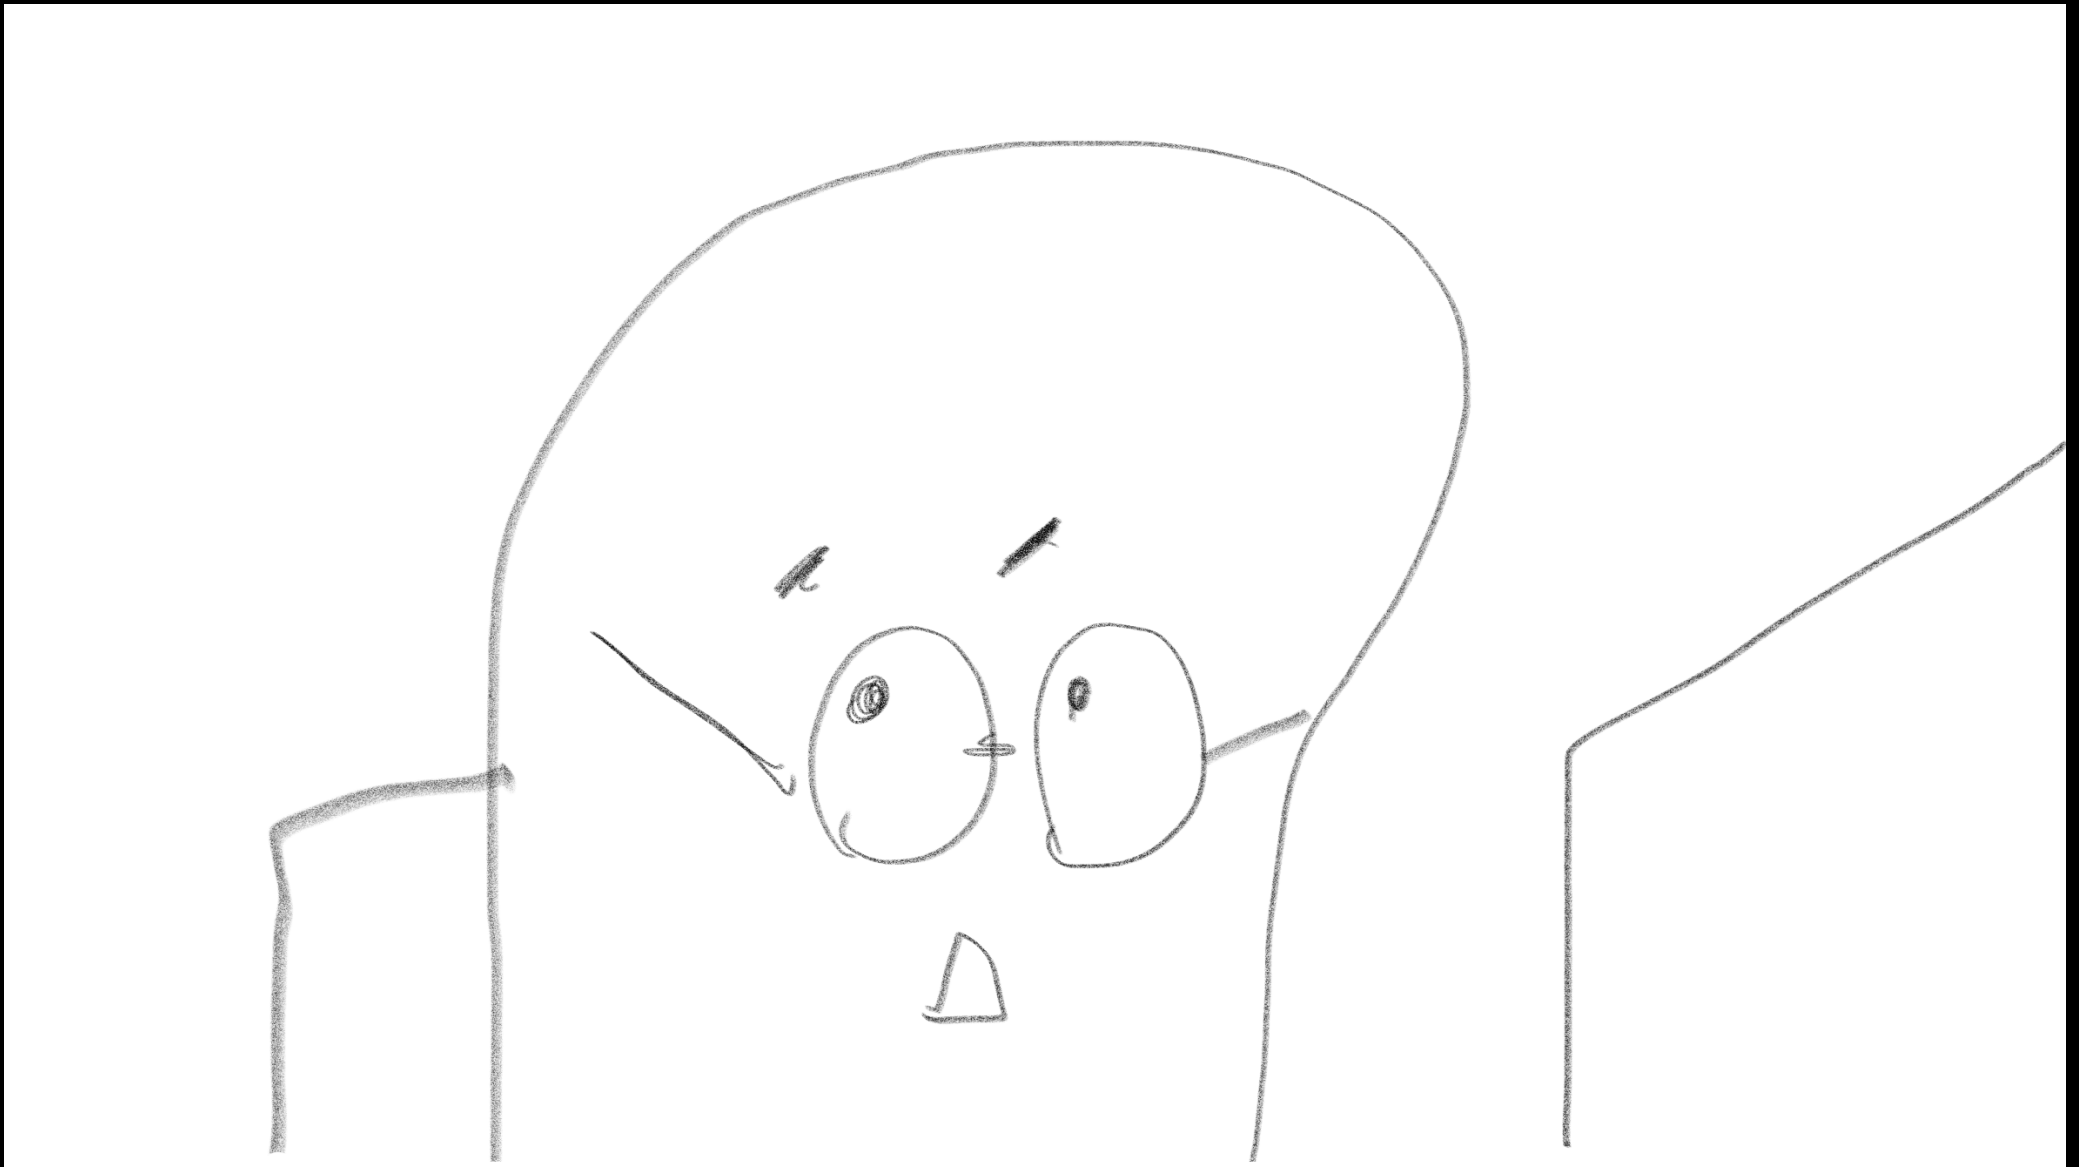

Cookie: Bug...!

Cookie: It looks like there's a problem but...

Bug: Ooo. someone's getting fired over there!

Cookie: If only...

Breach traced back to 'iMustacheU

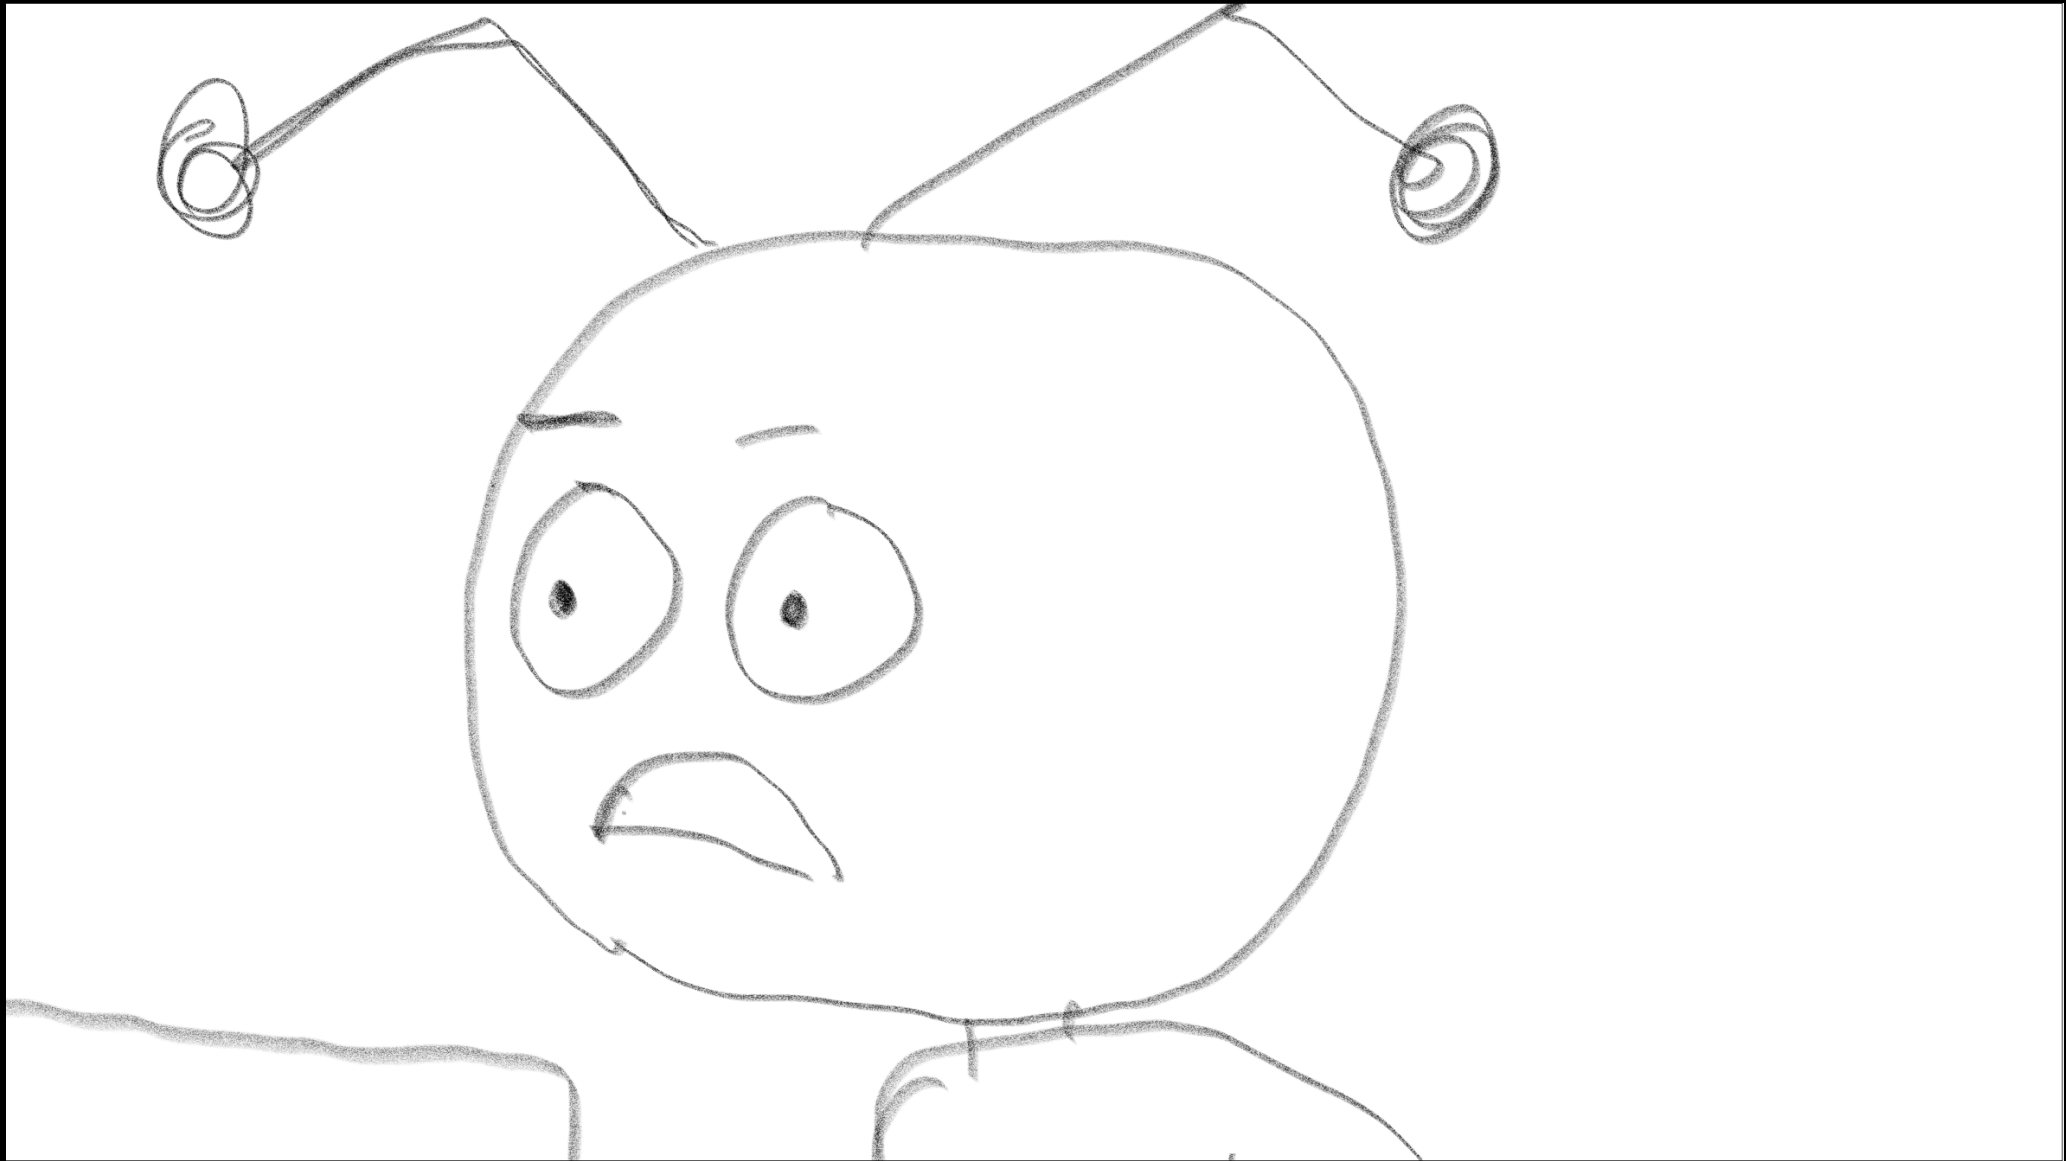

Someone's getting fired!

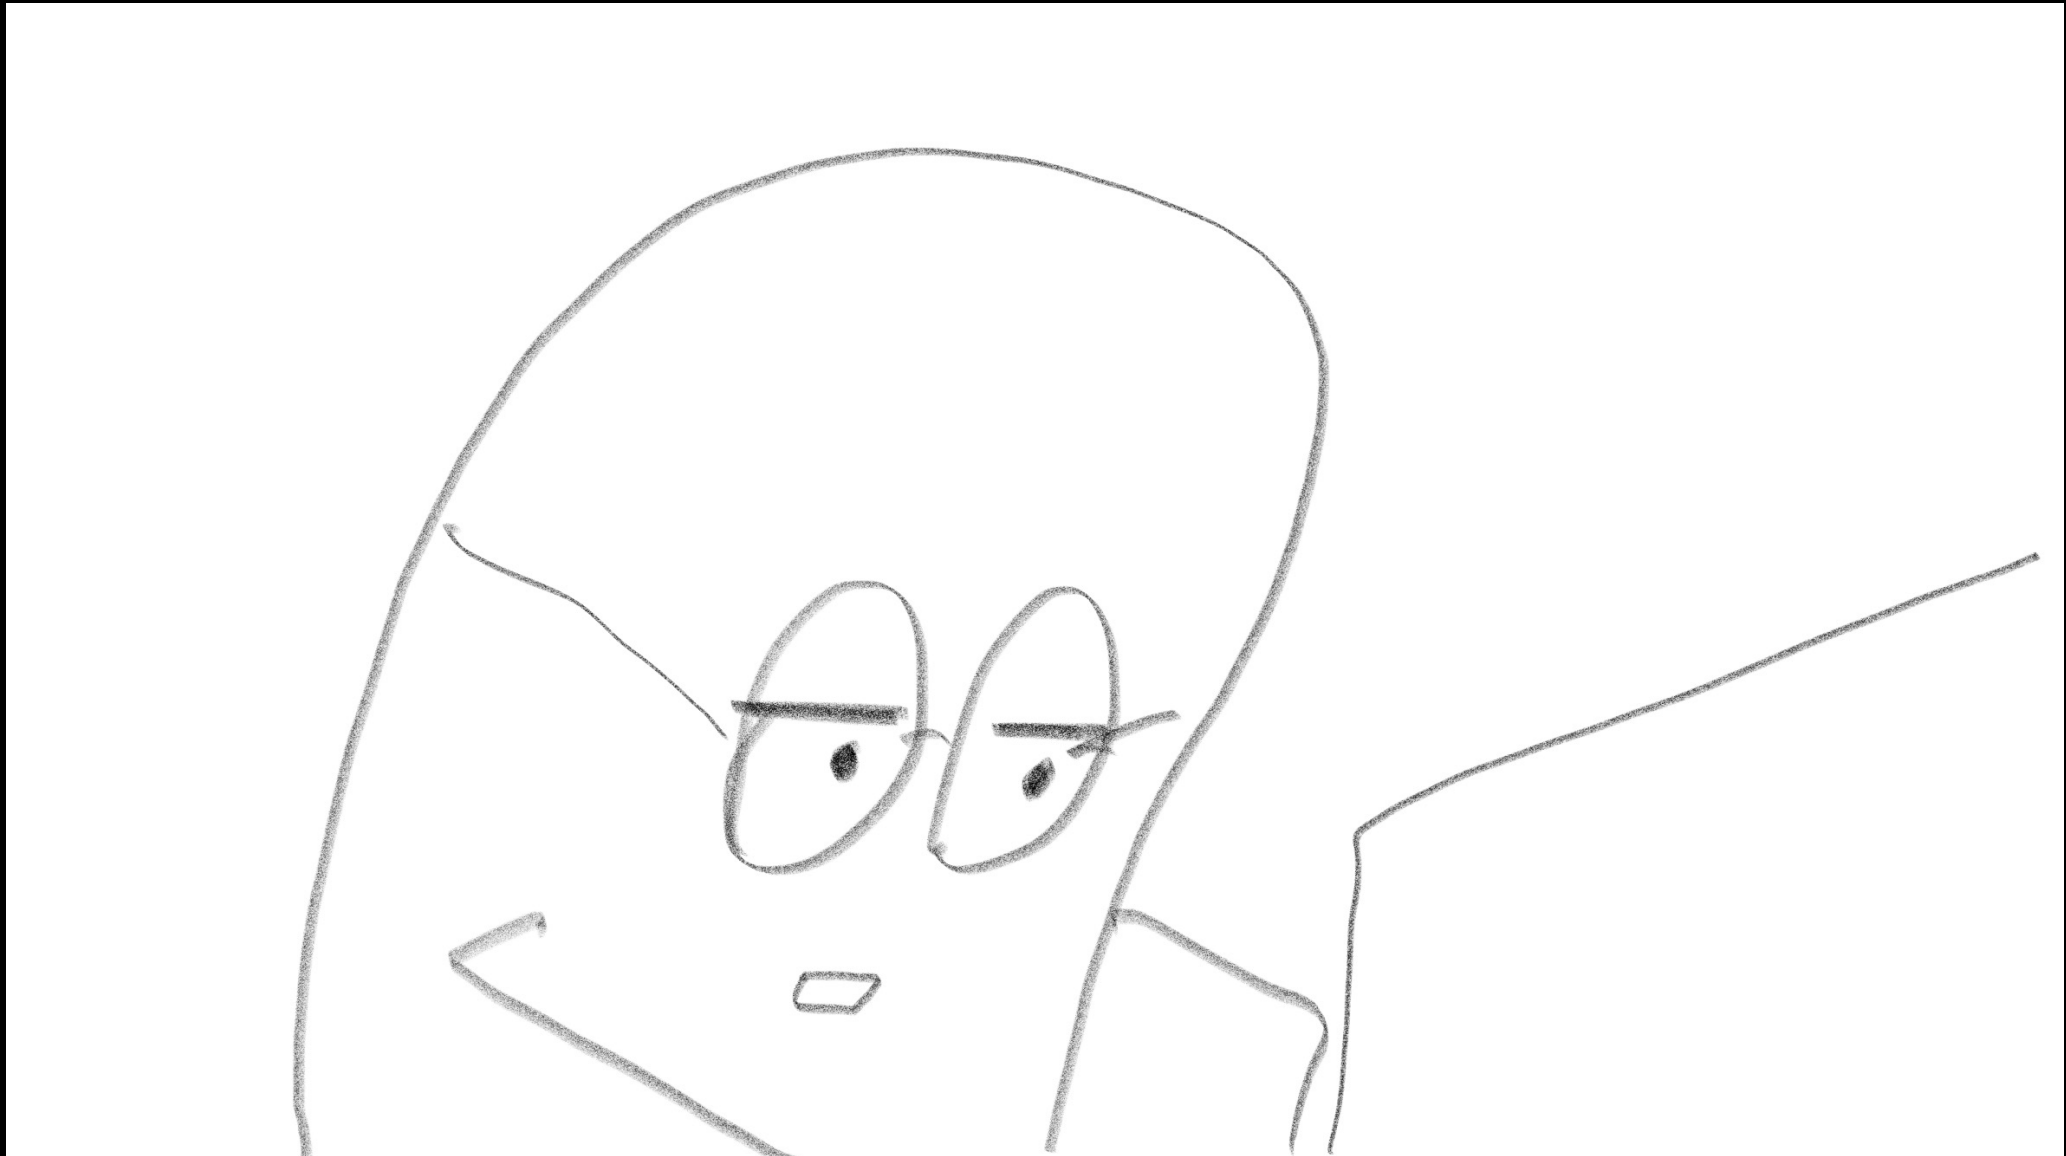

Did you hear about the massive breach?

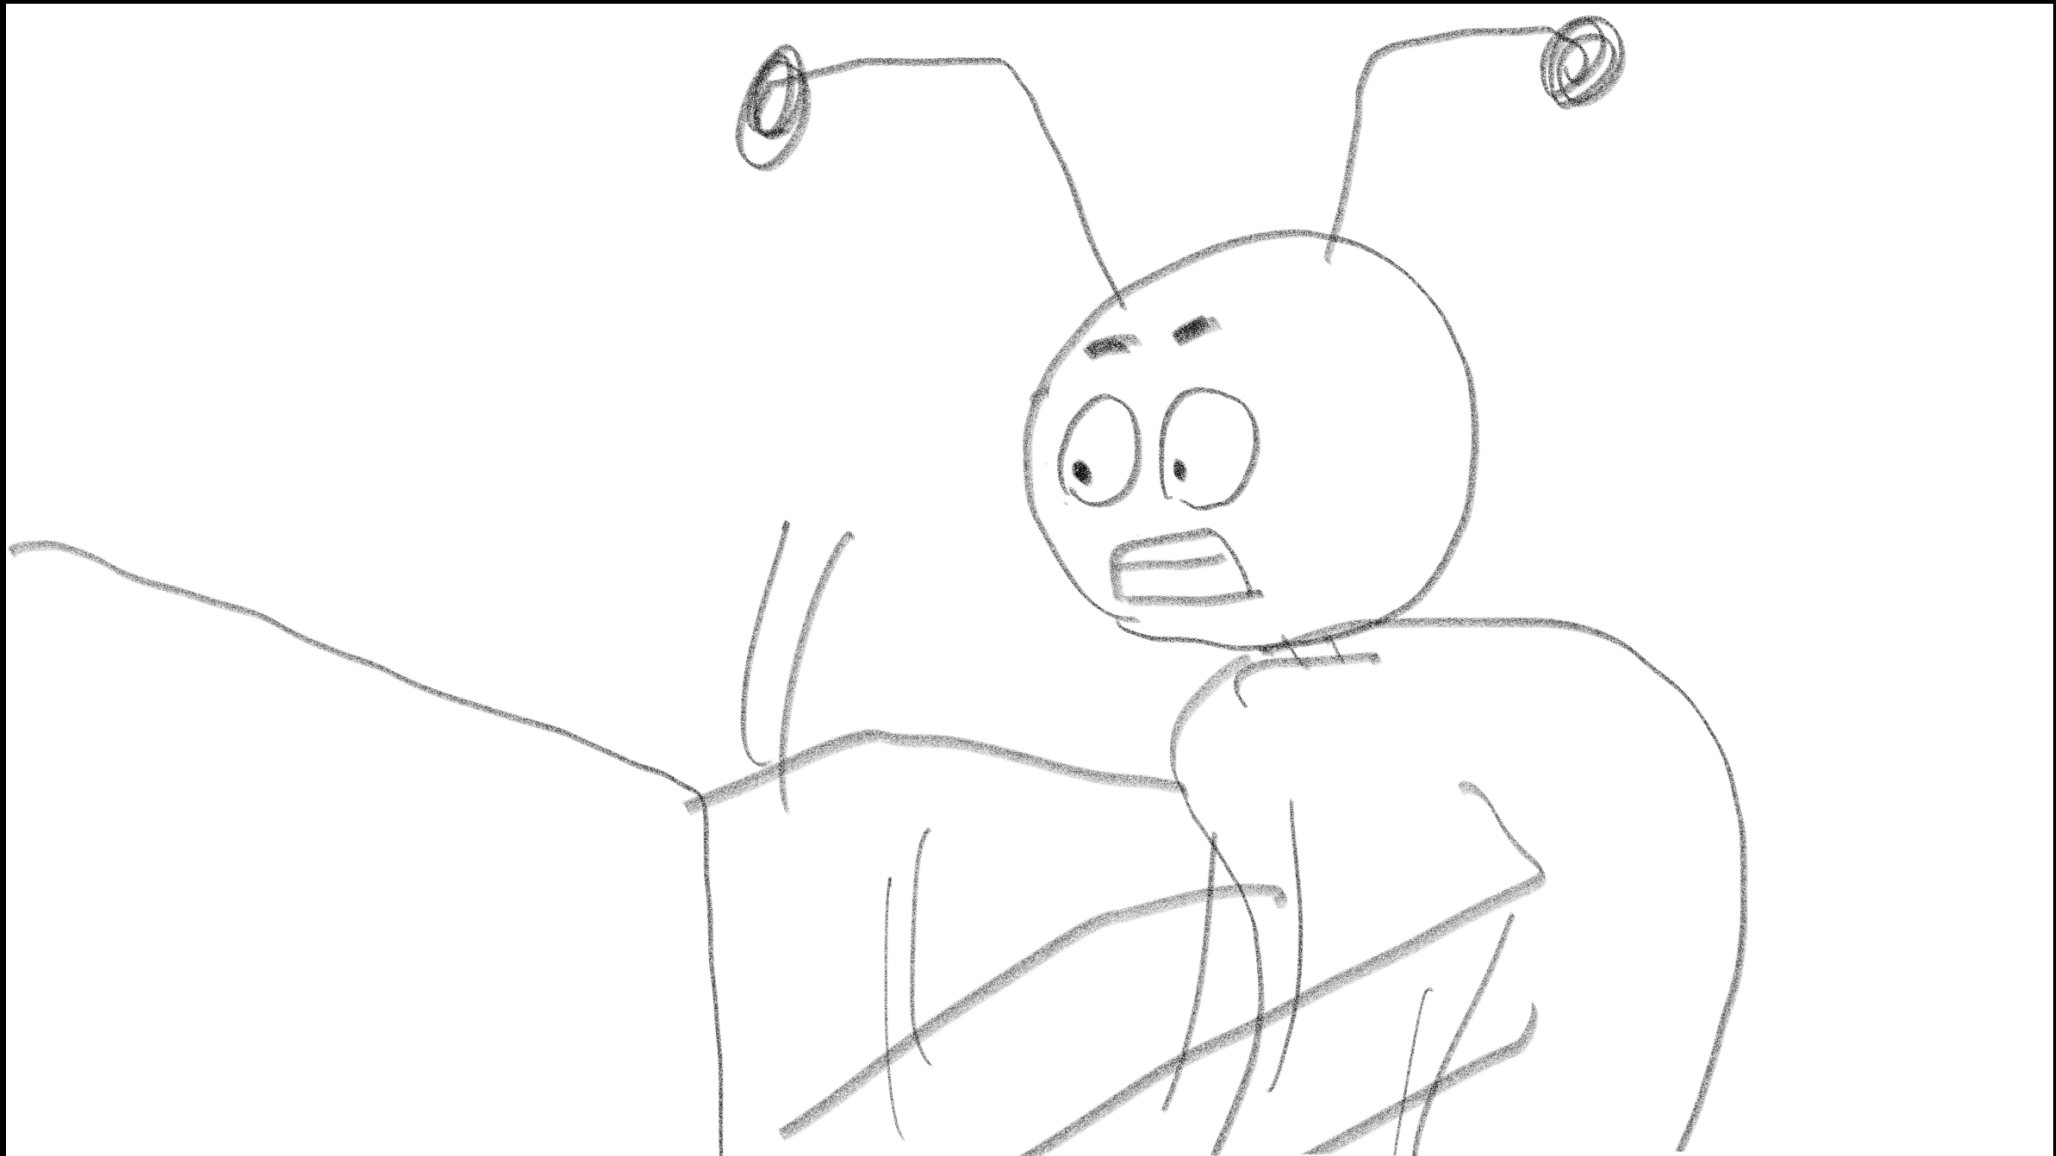

Bug: Oh my god...

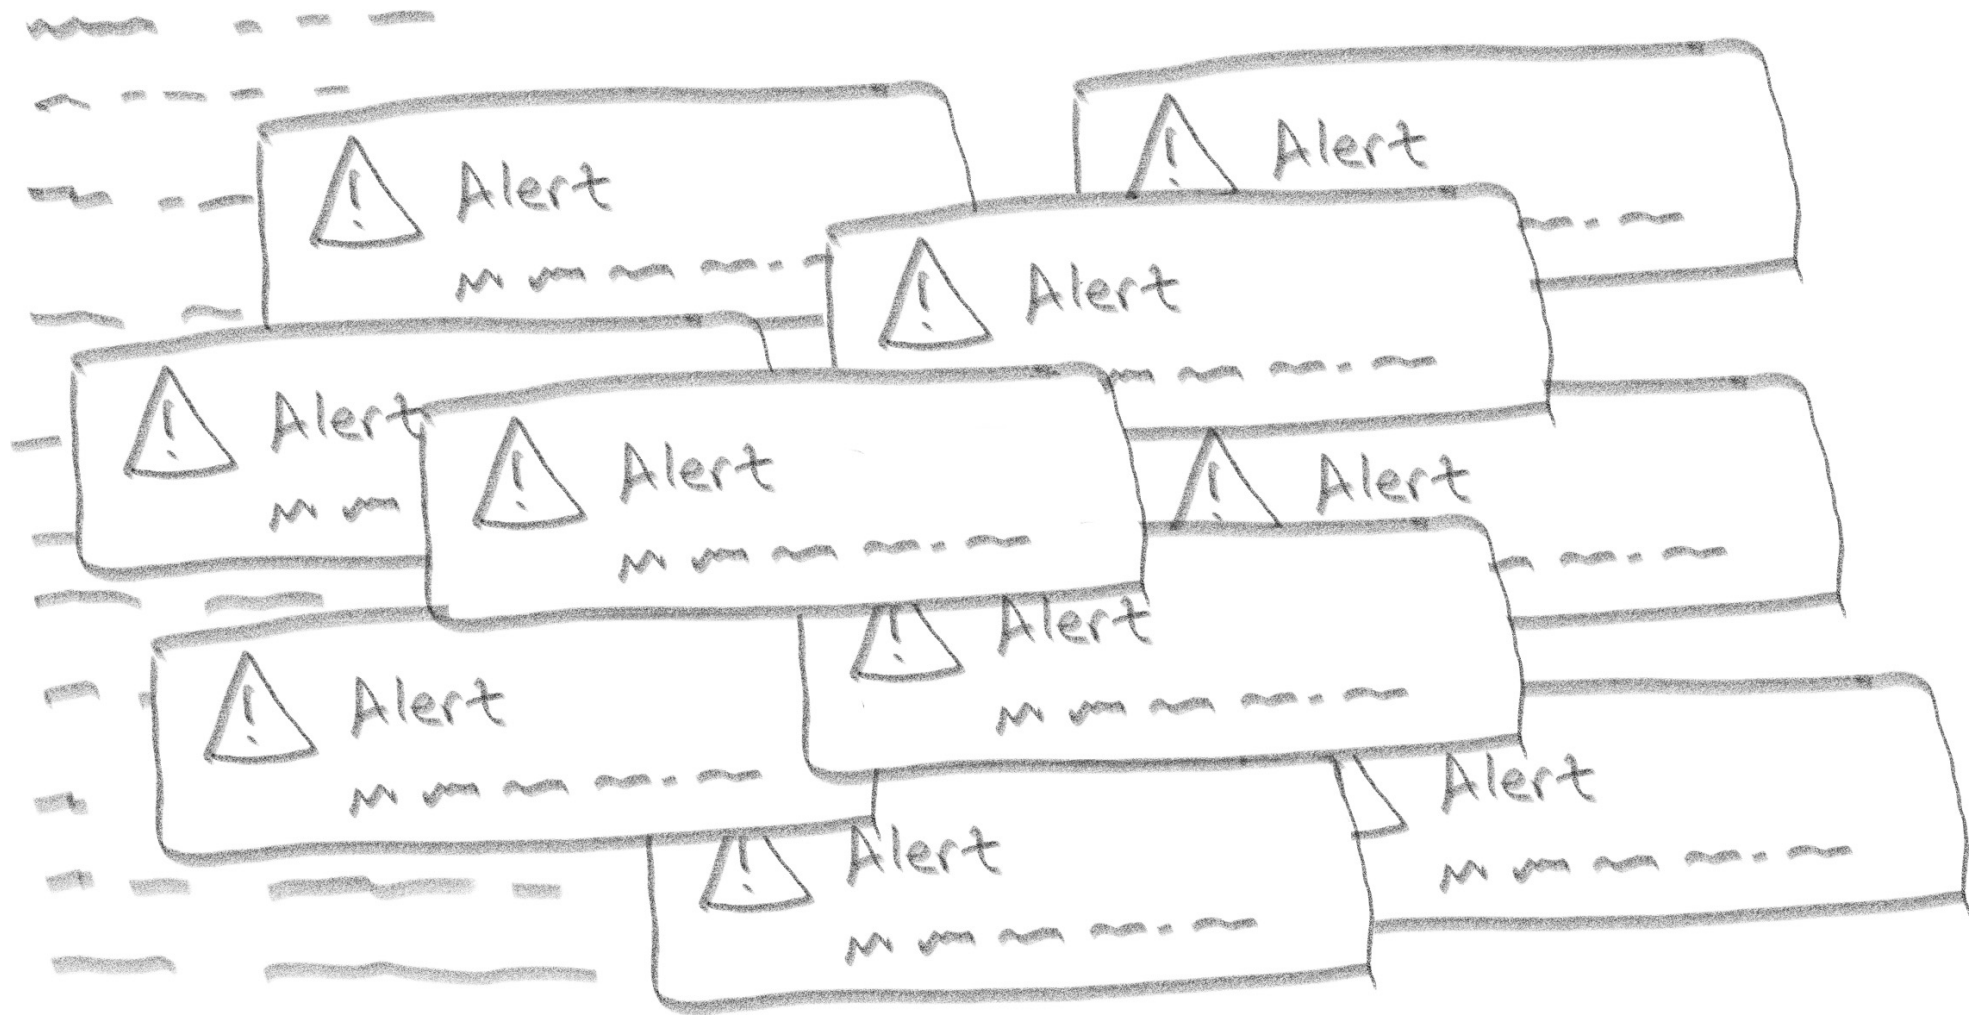

Bug: It's us!

Cookie: If we just add encryption to the S3 bucket...

Bug: Where is it? Where is it?

Bug: Where is it?

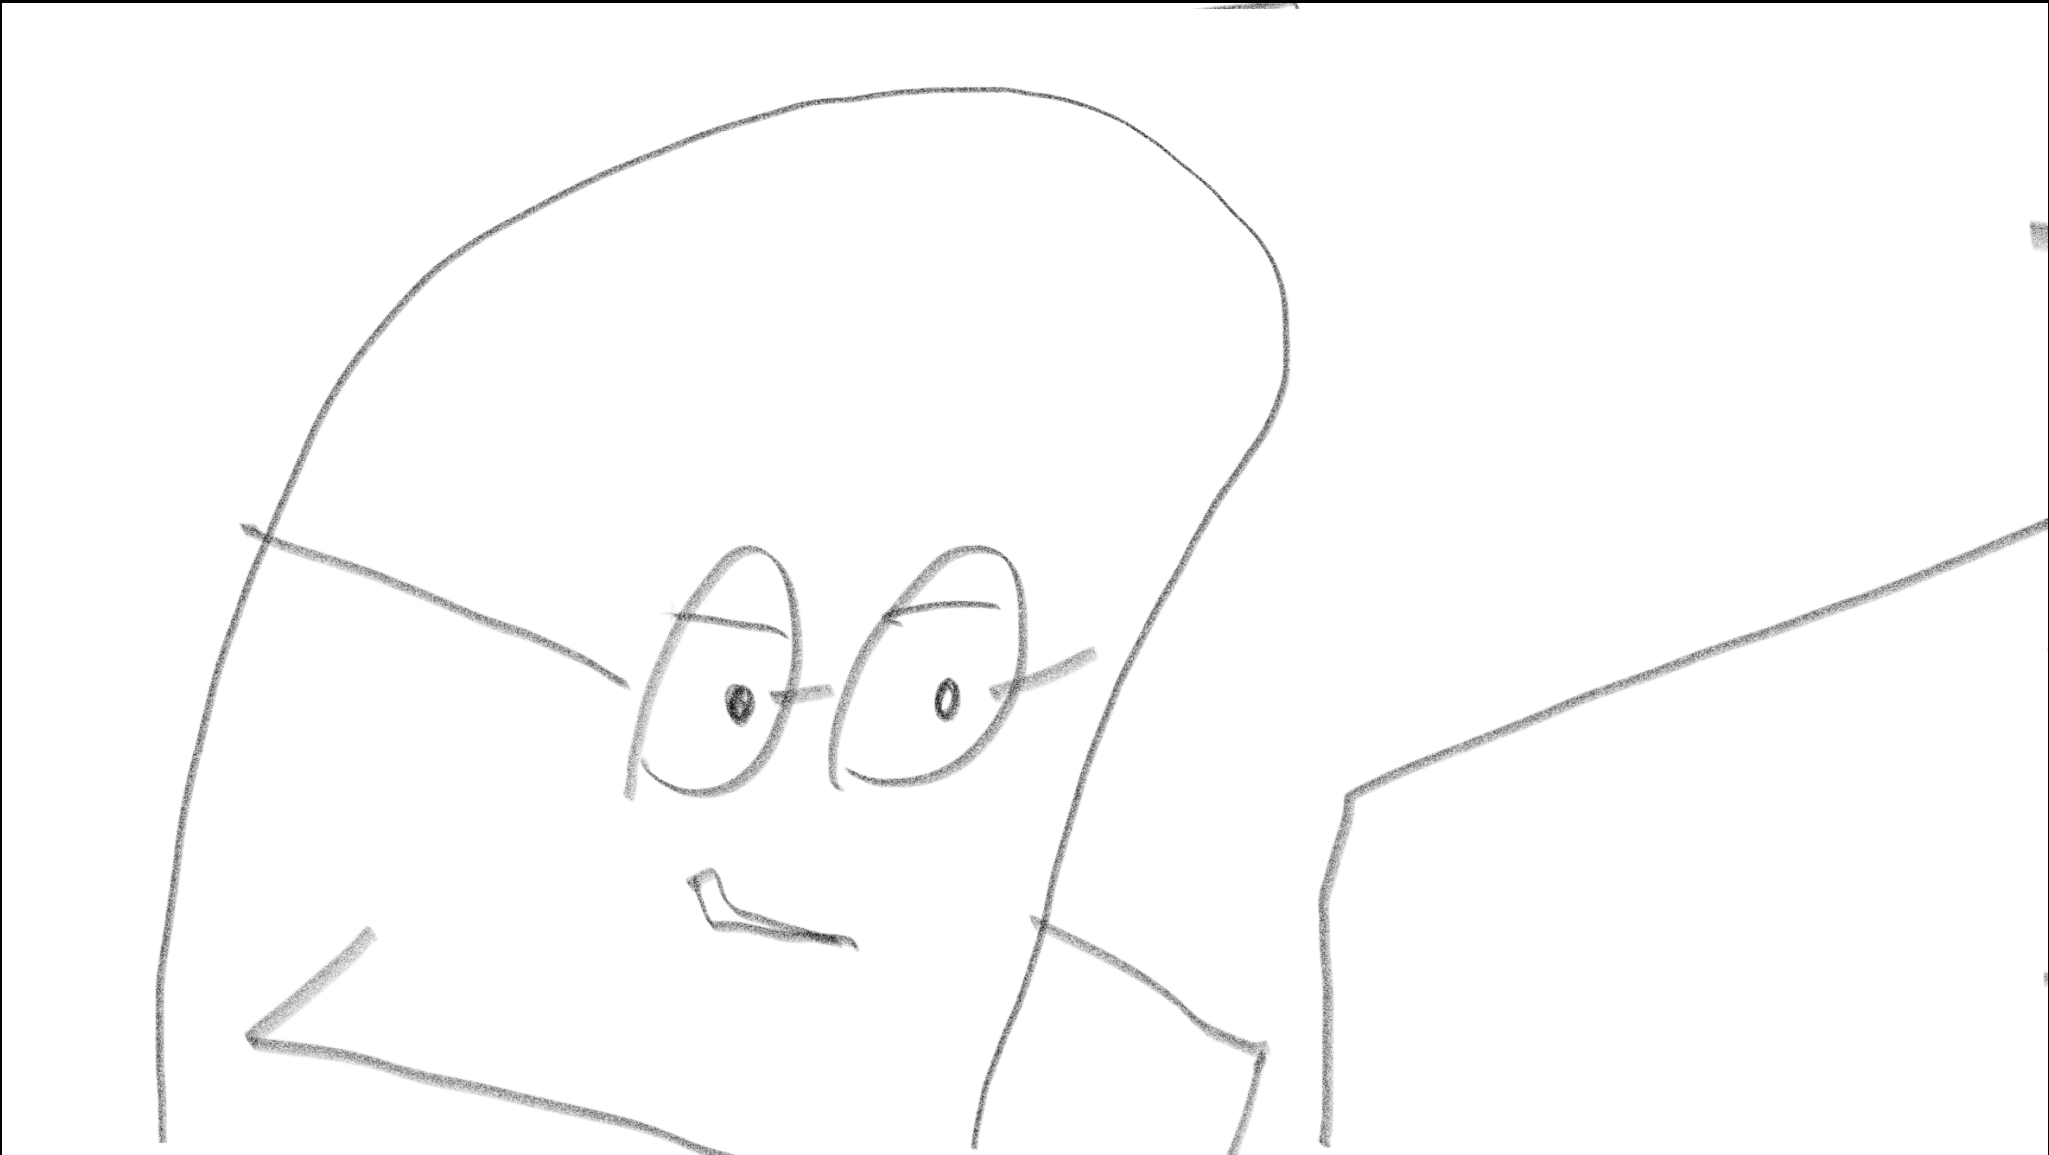

Cookie: ...Now let's switch ACL to private....

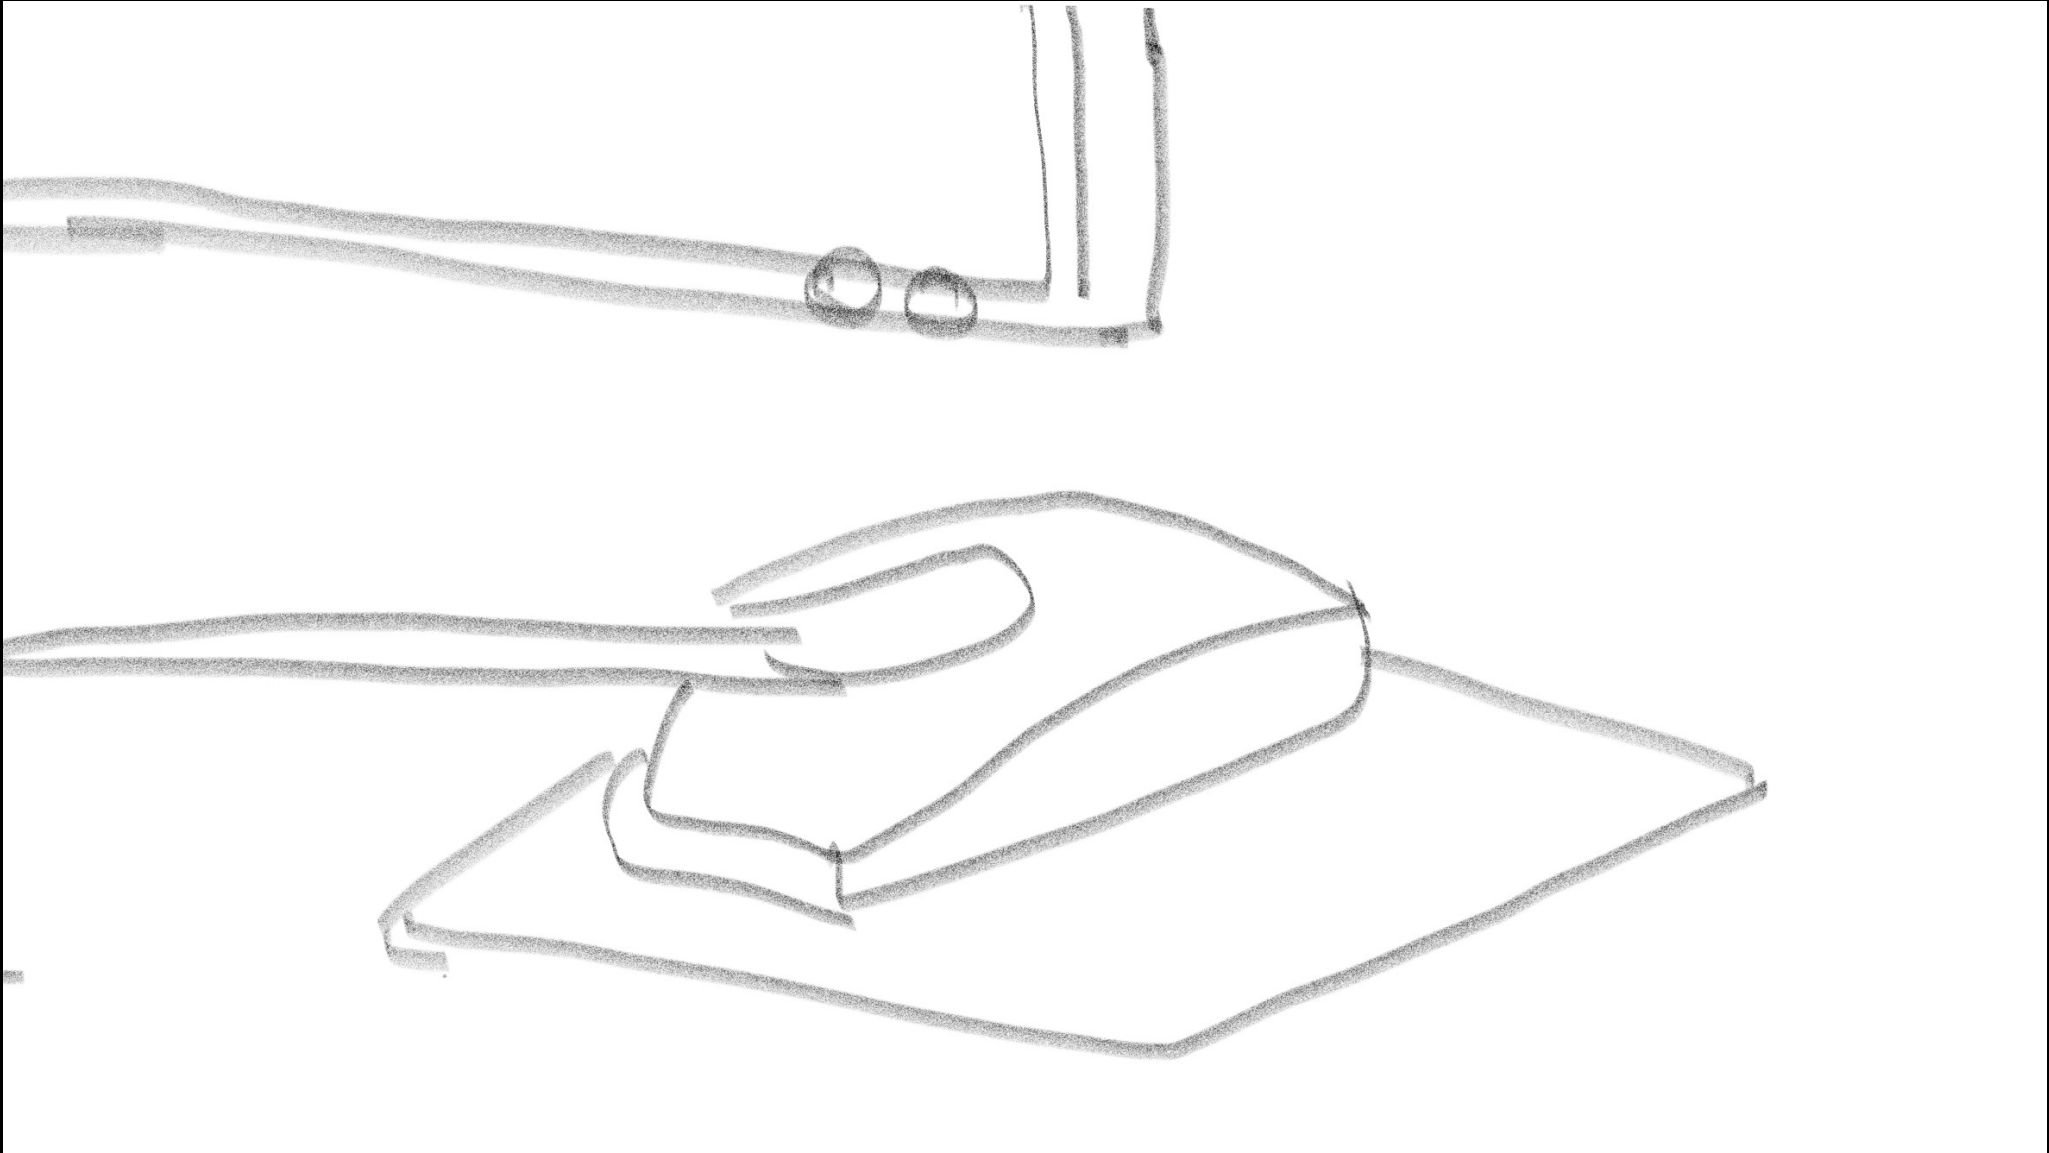

Bug: I can't find it!

Bug: Aahh!

Bug: And then just...

Bug: ...click...

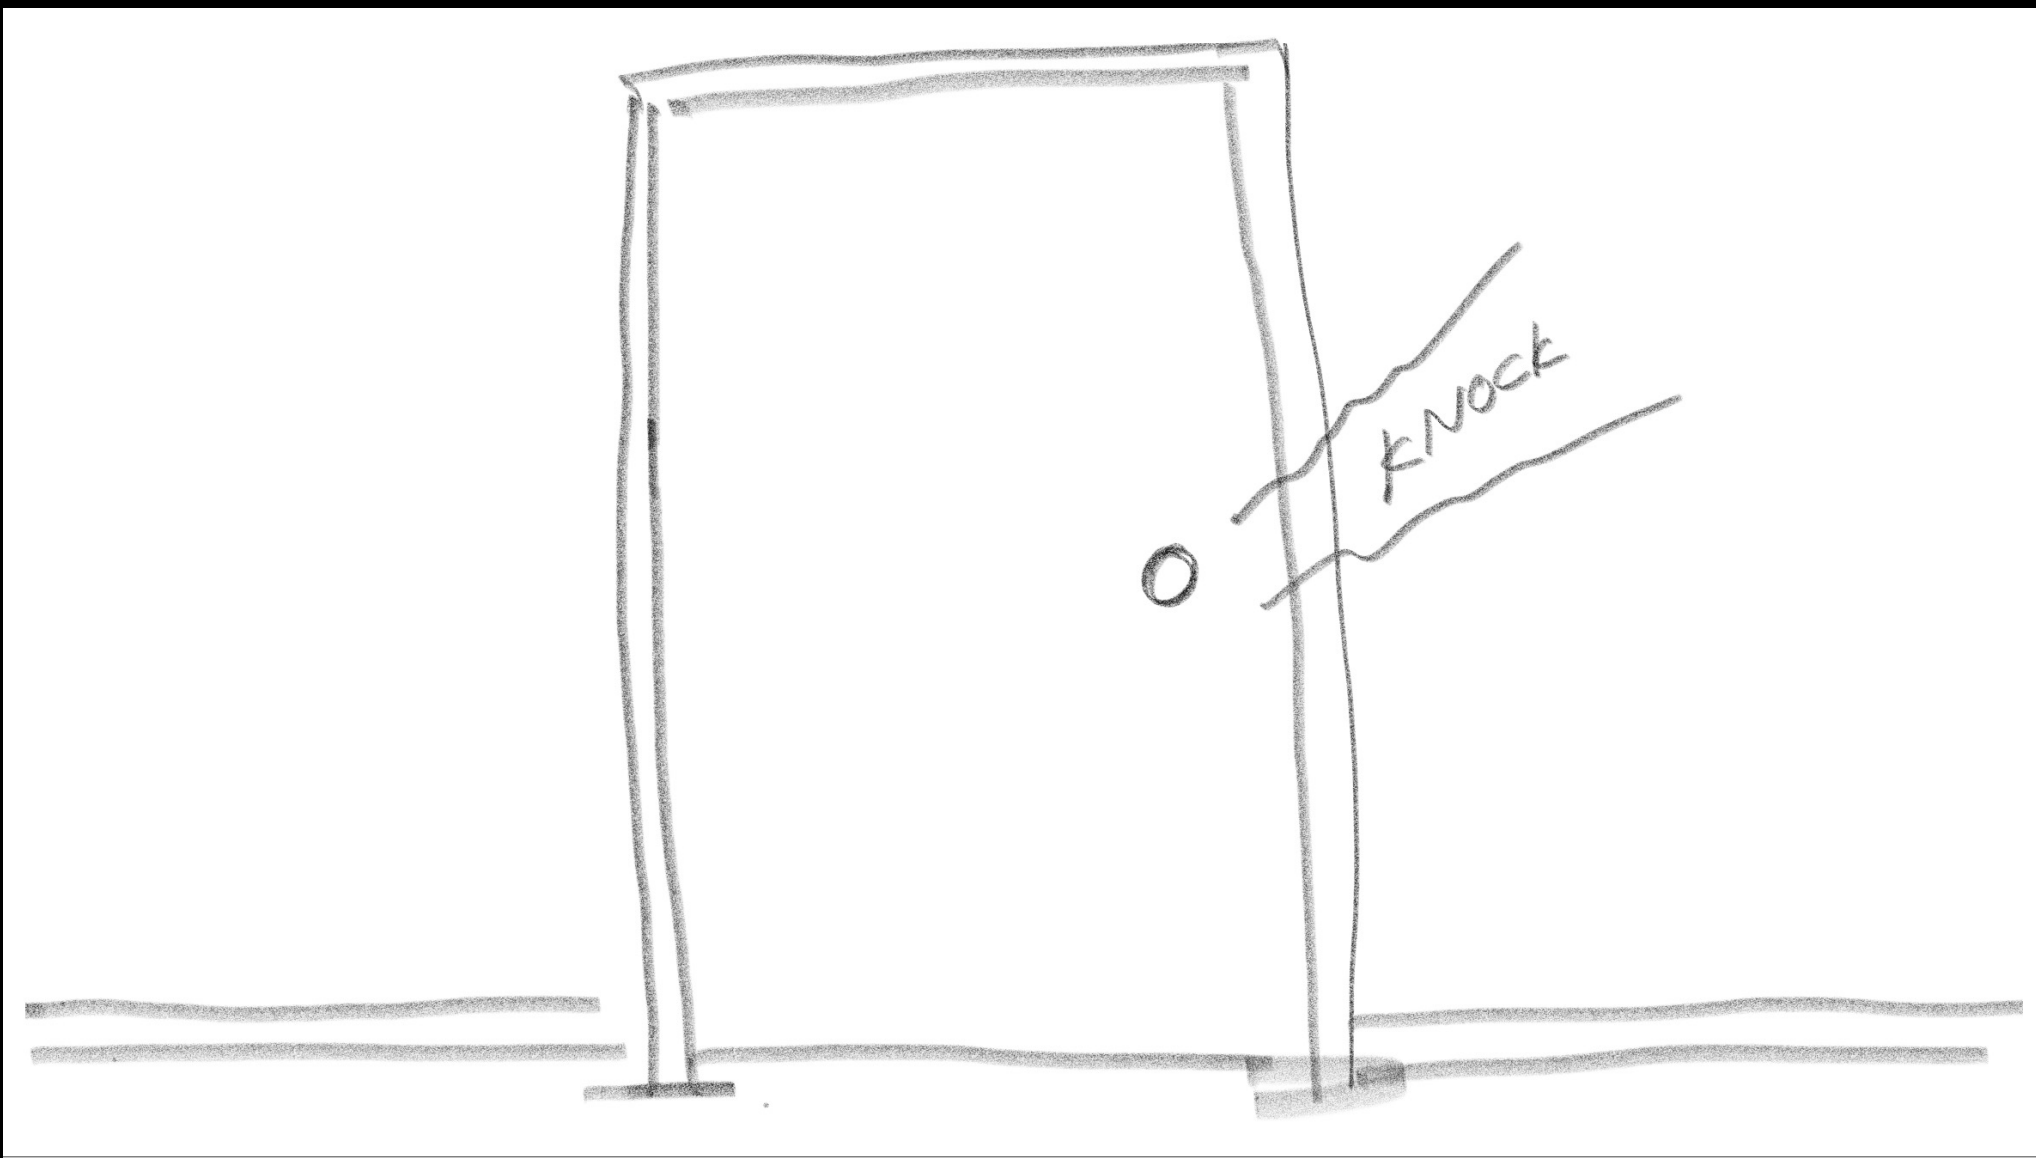

Bug: ...Submit.

🇮🇵 | Mustach U team saved the day!

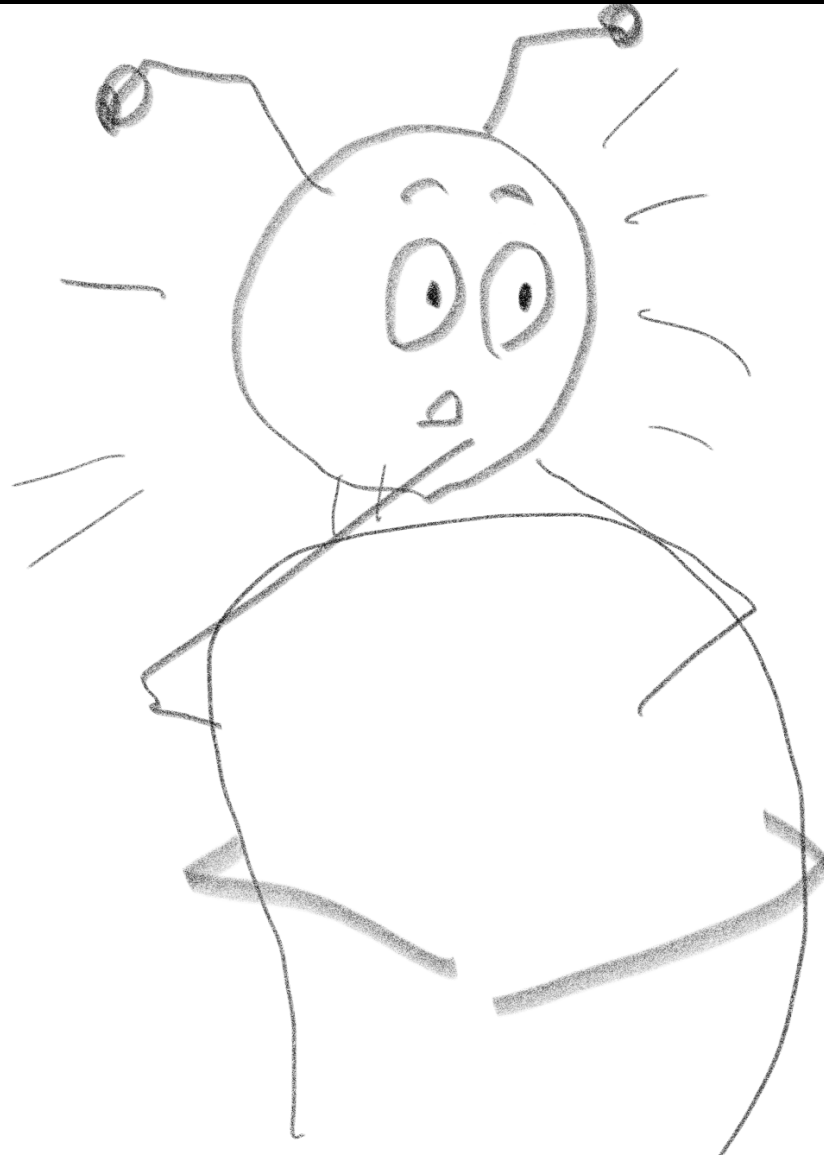

🇮🇵 Woohoo!!!!

🇮🇵 Breach has been resolved!

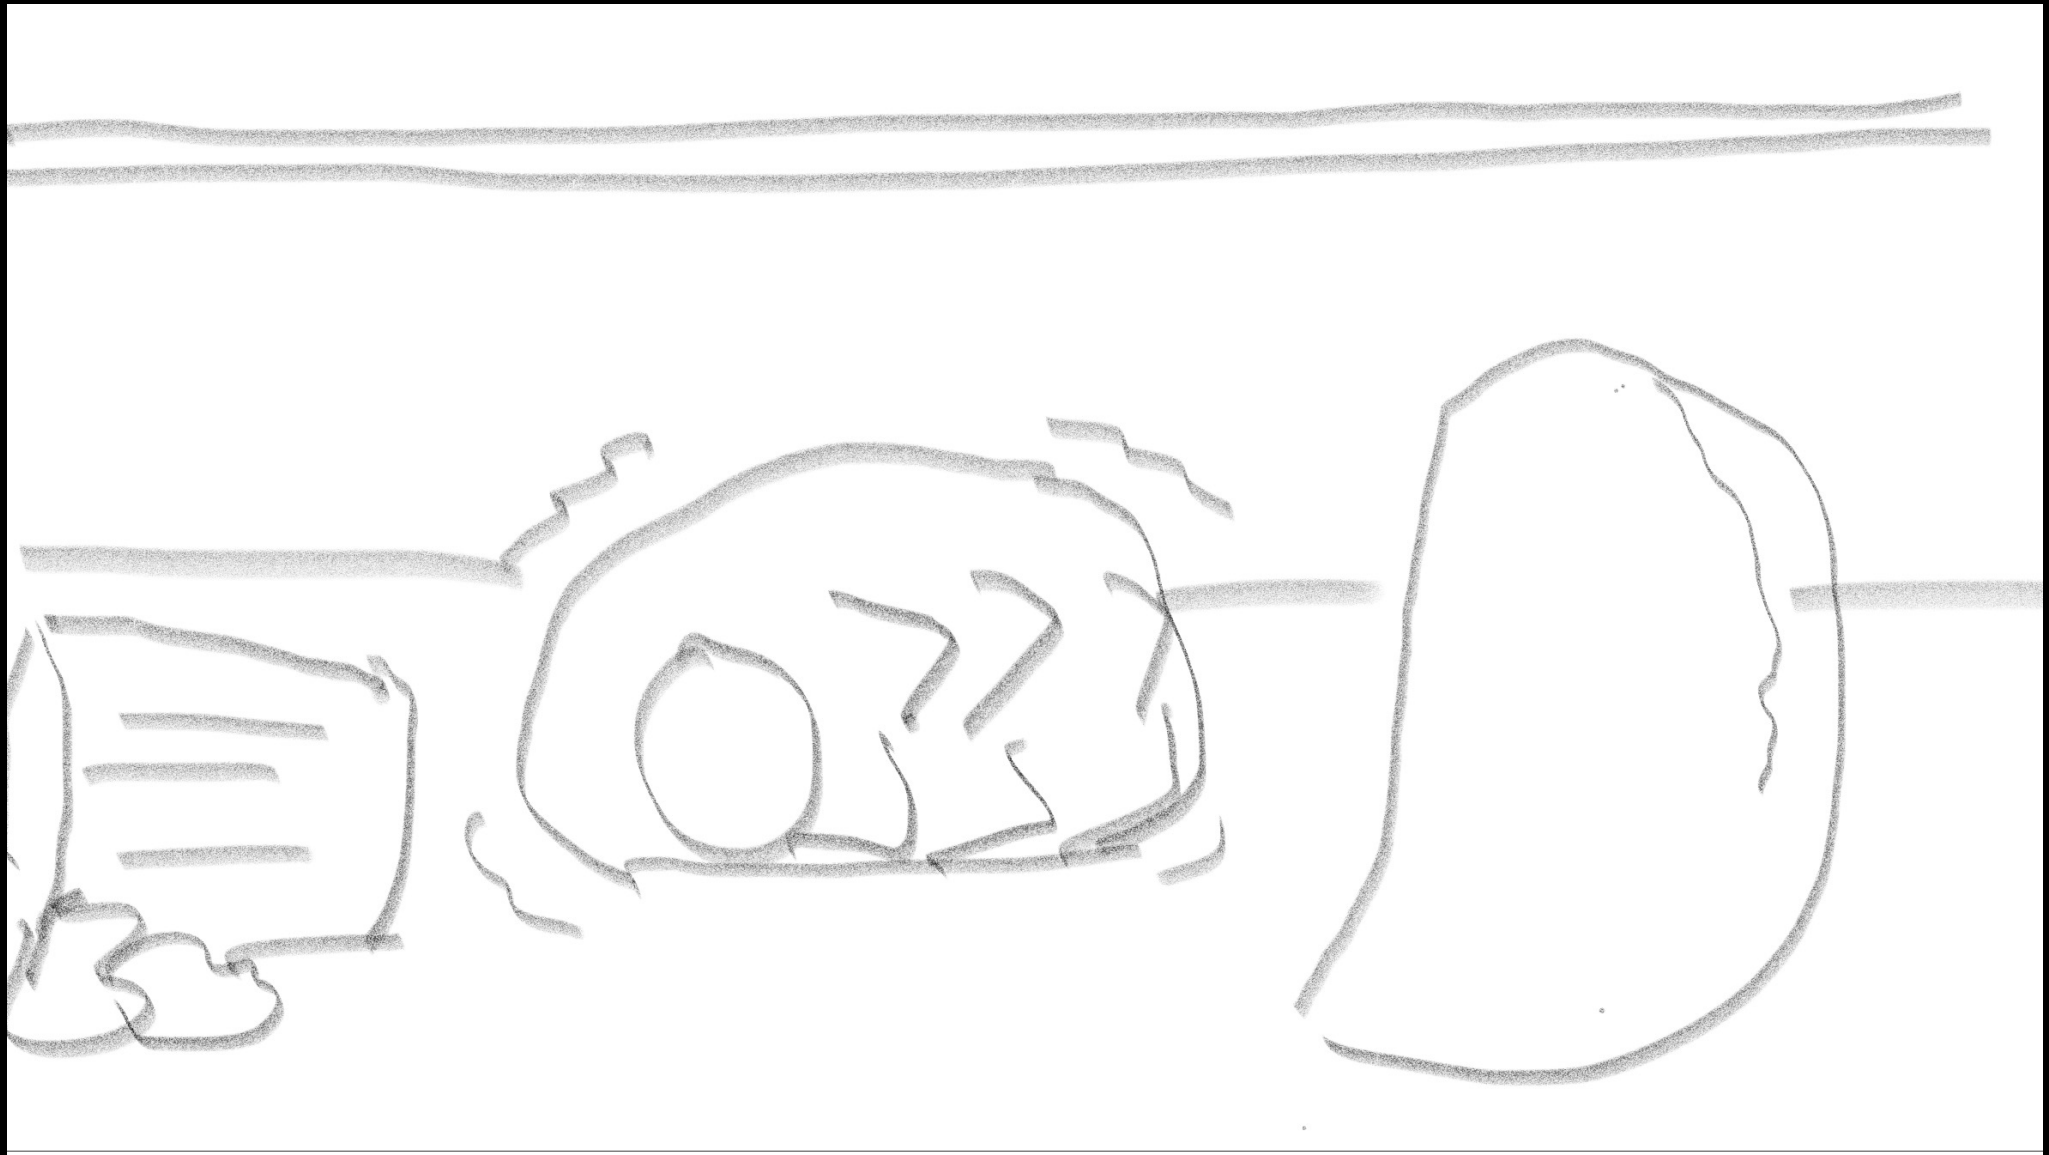

(Reactions flood in)

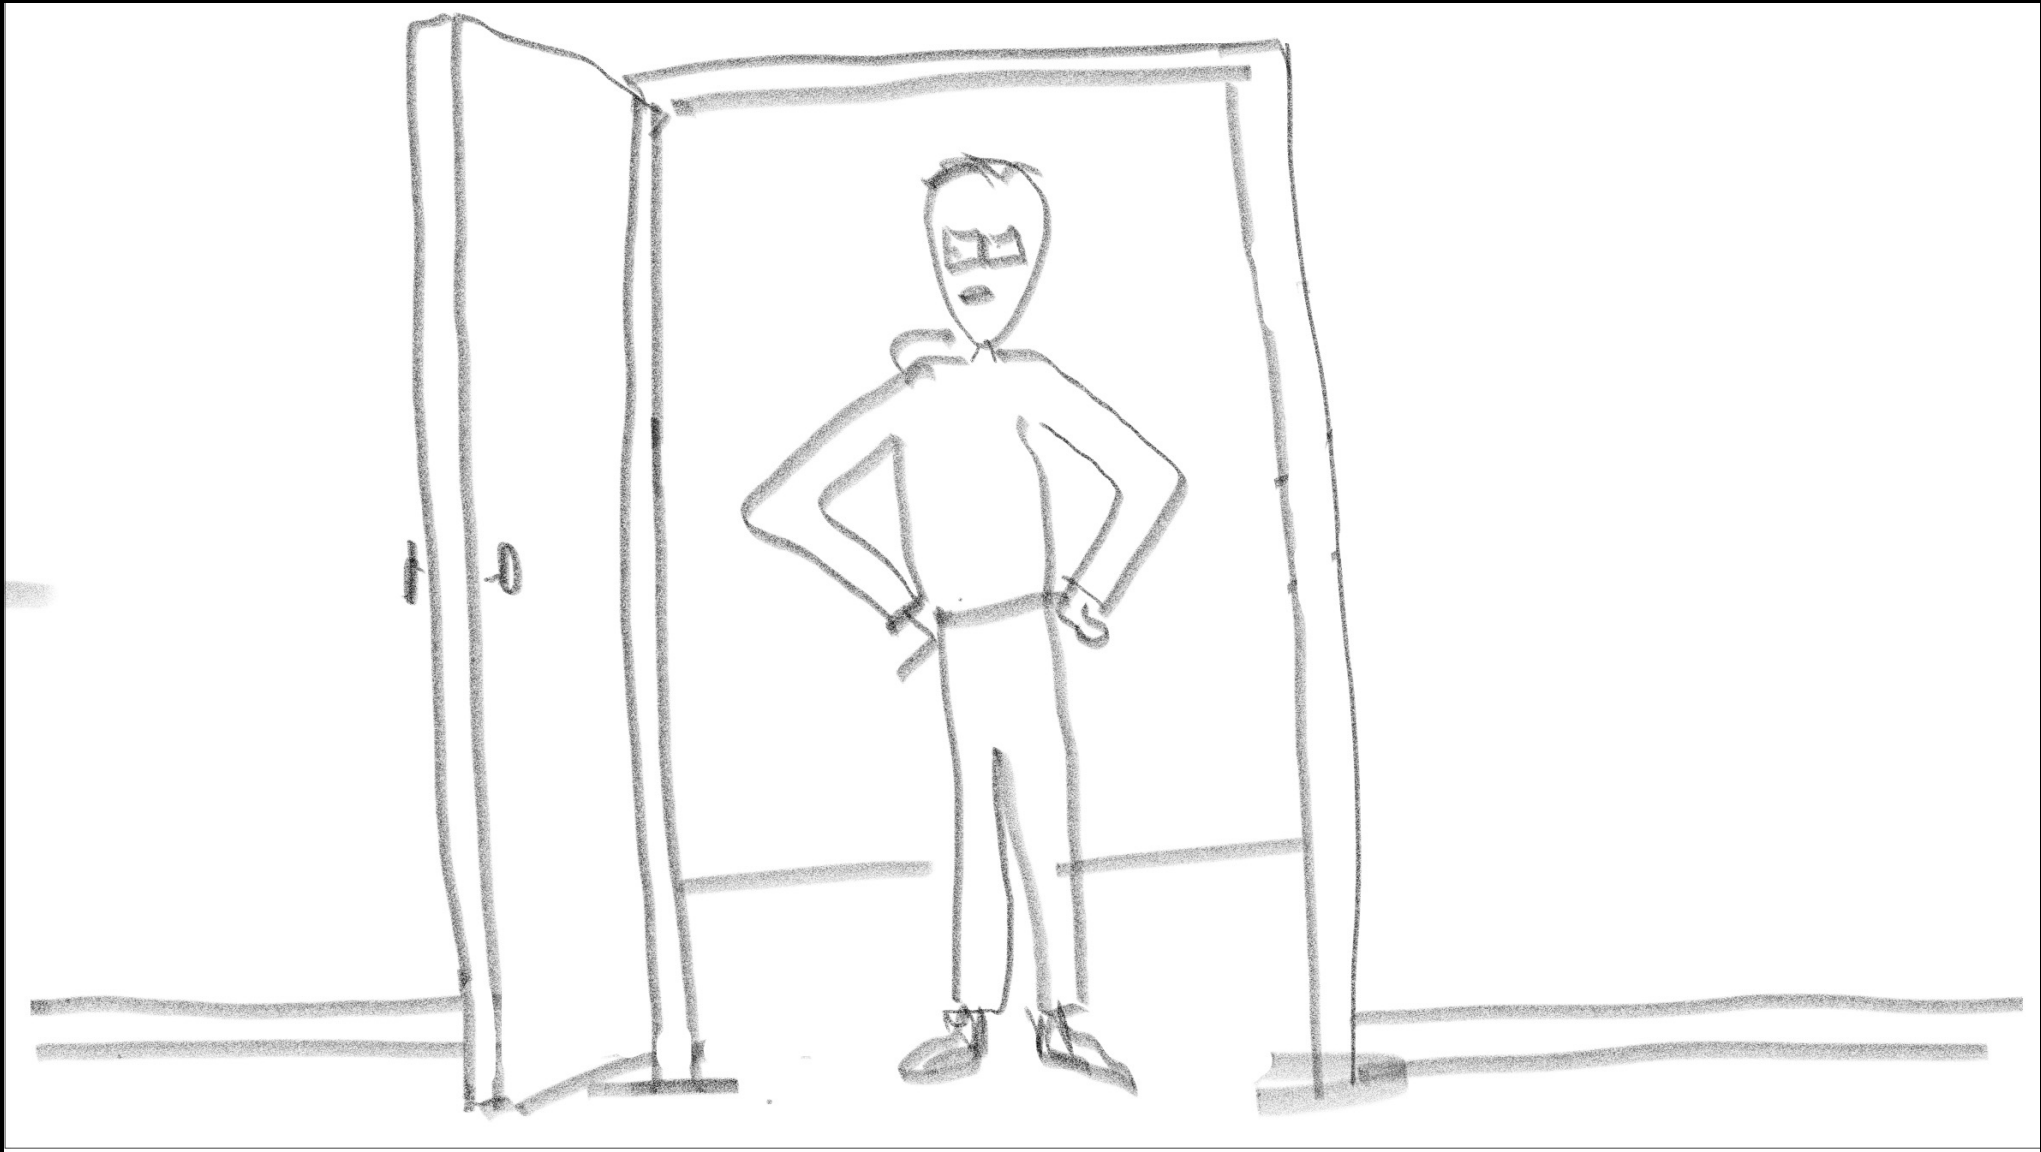

(Knock at the door)

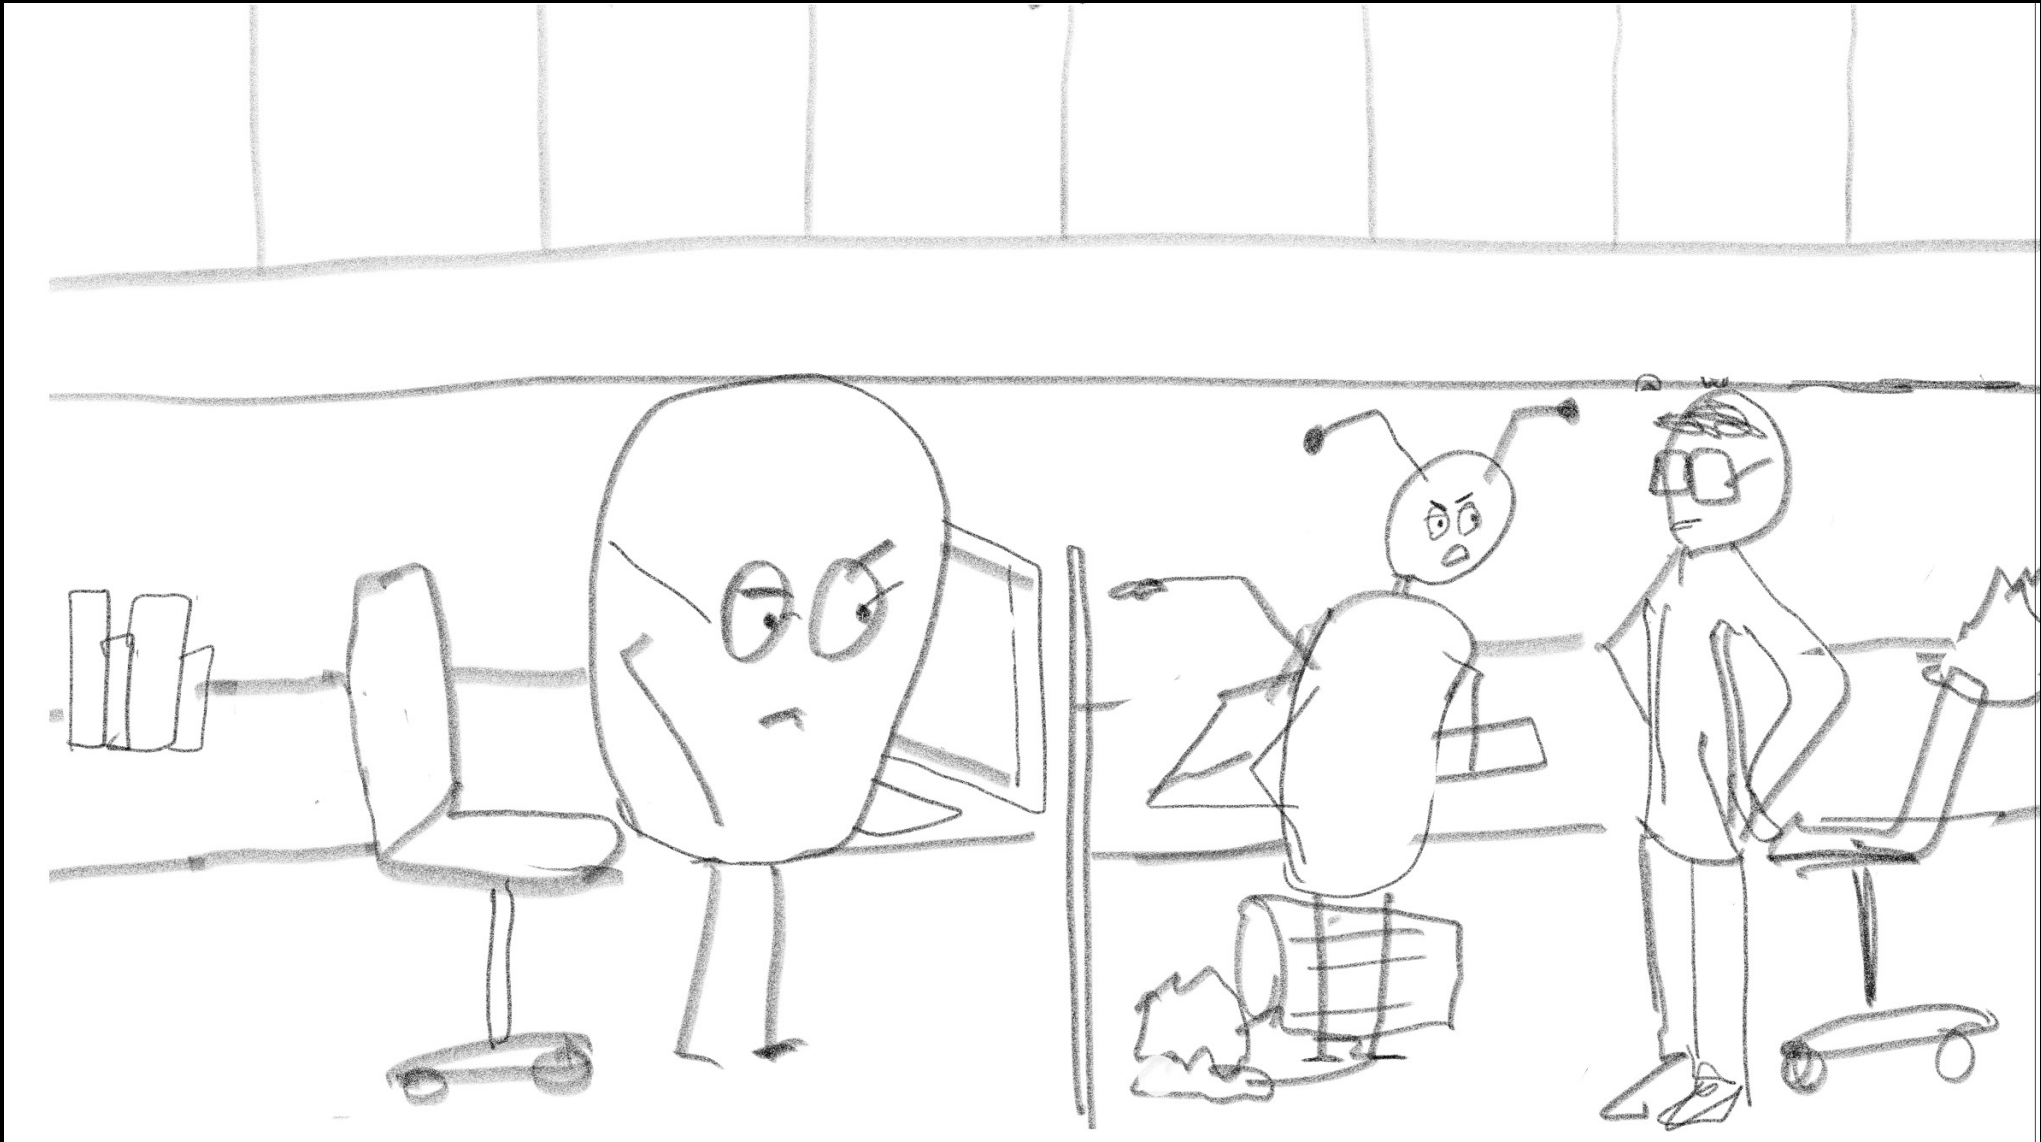

(Bug in a panic)

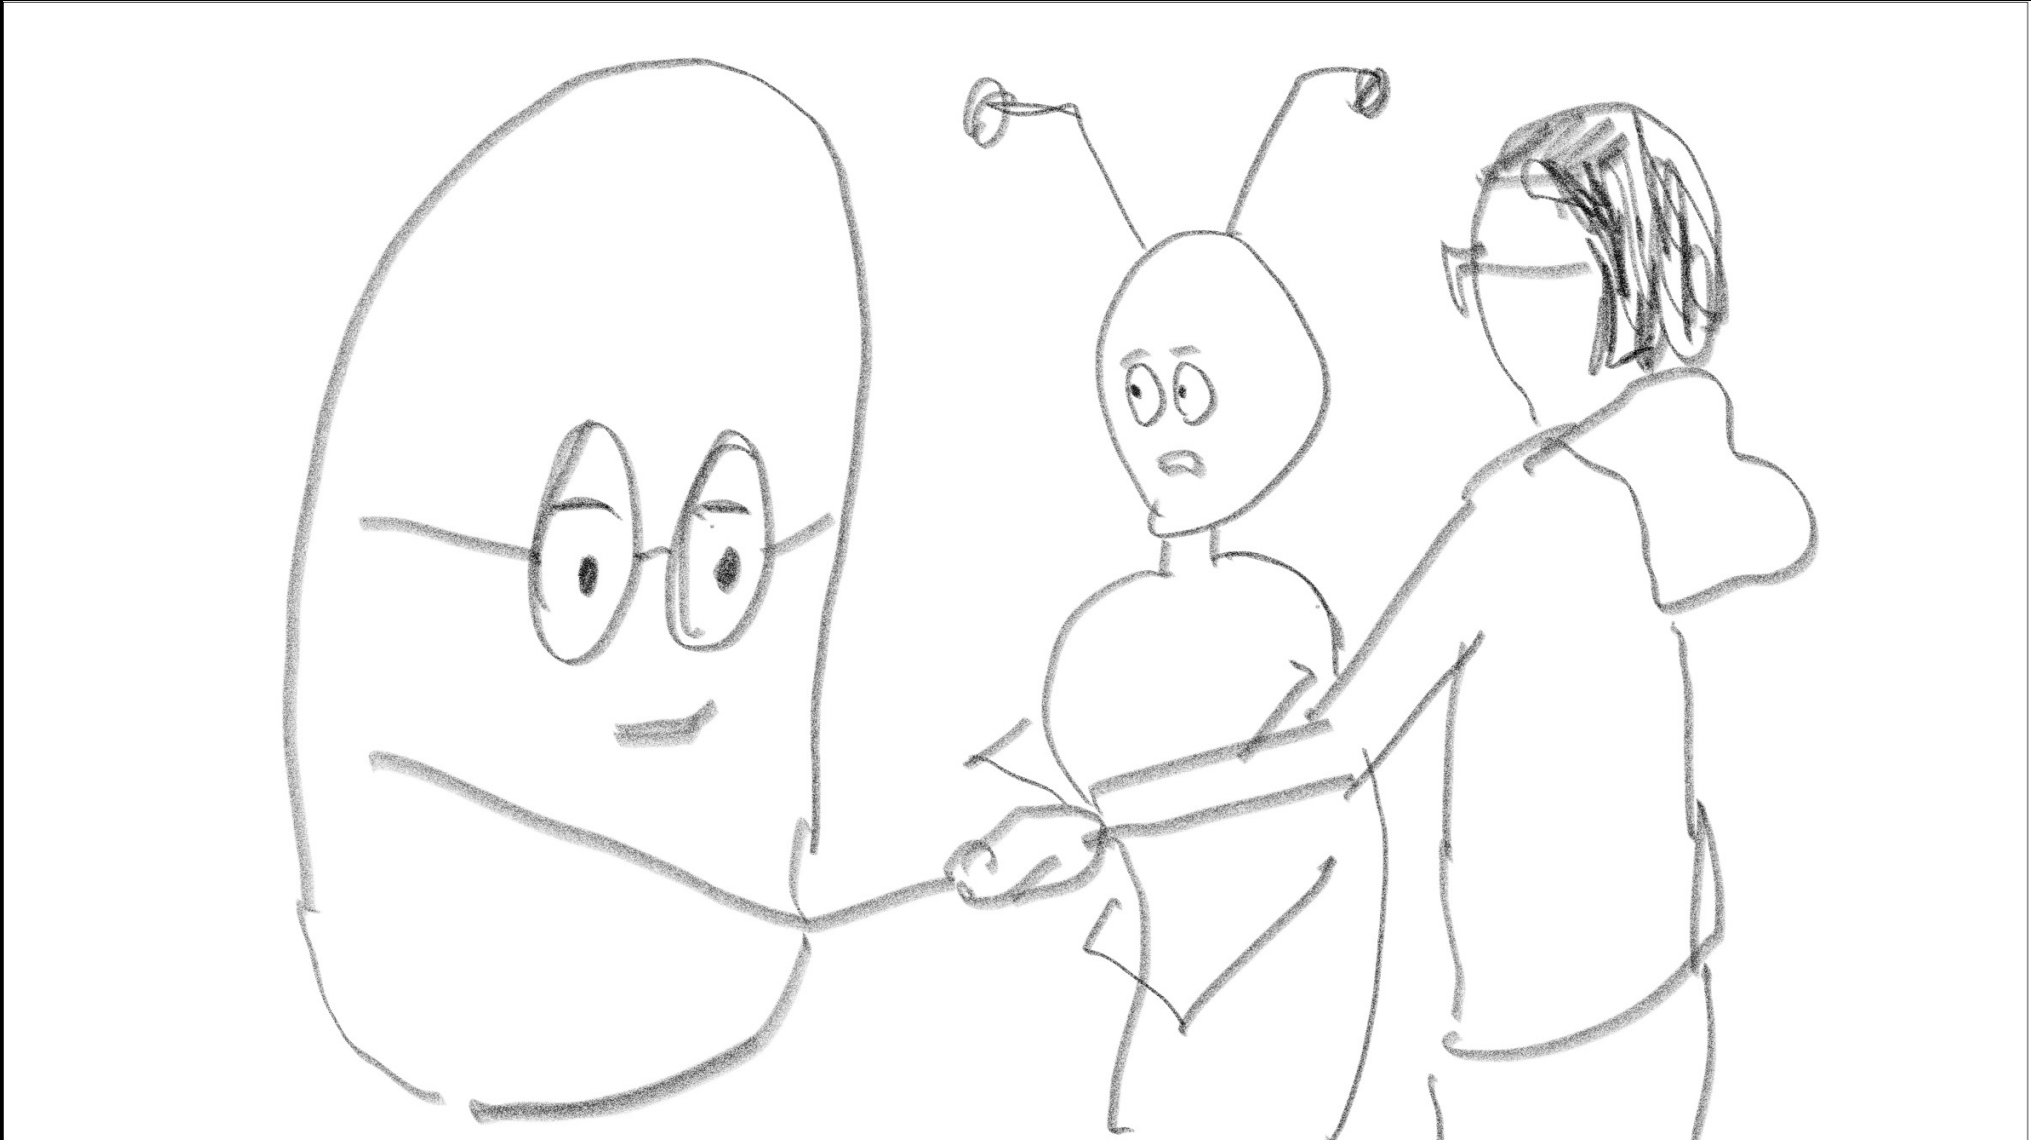

(Jumps out of exoskeleton, curls in fetal position under desk, trembling)

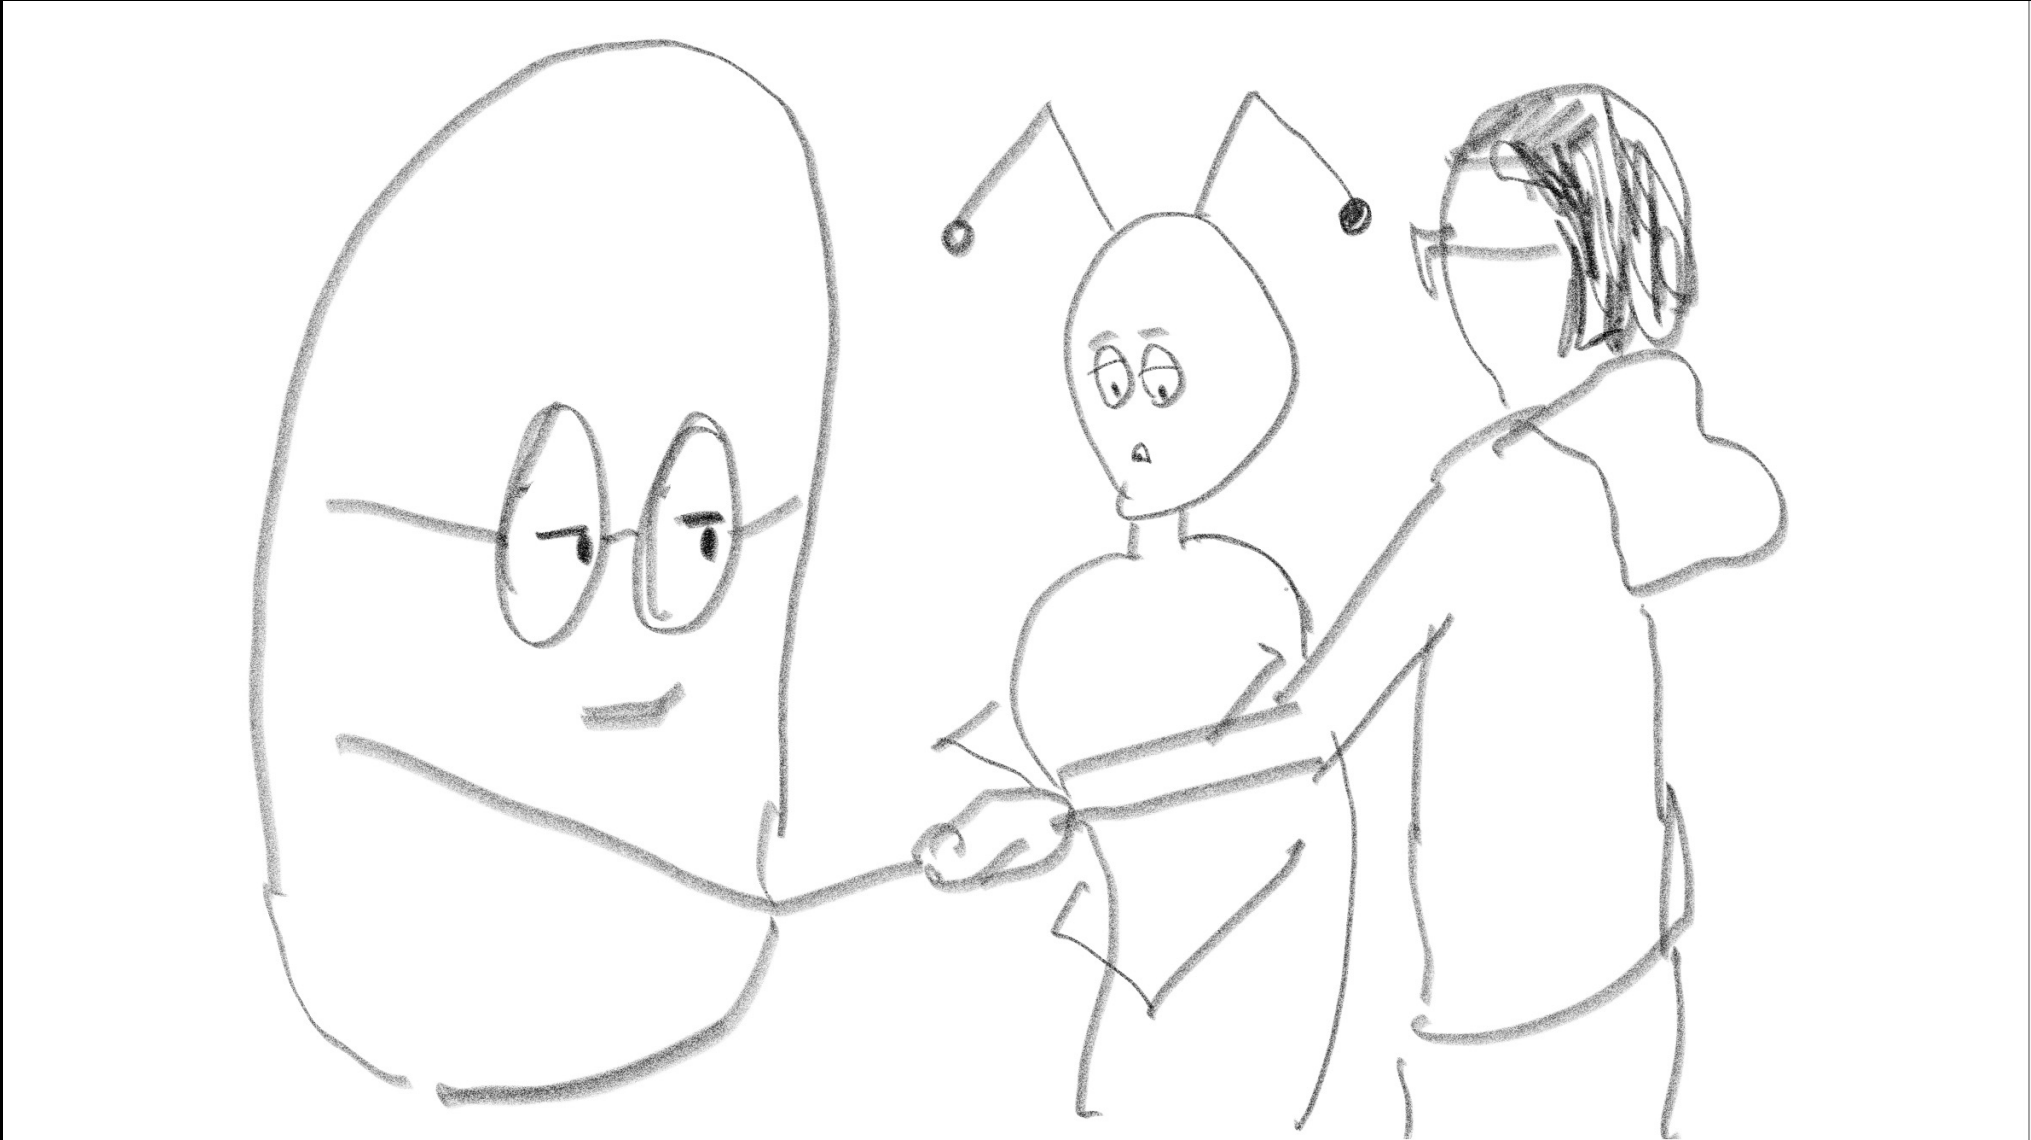

Manager: Ok guys, we need to have a team meeting.

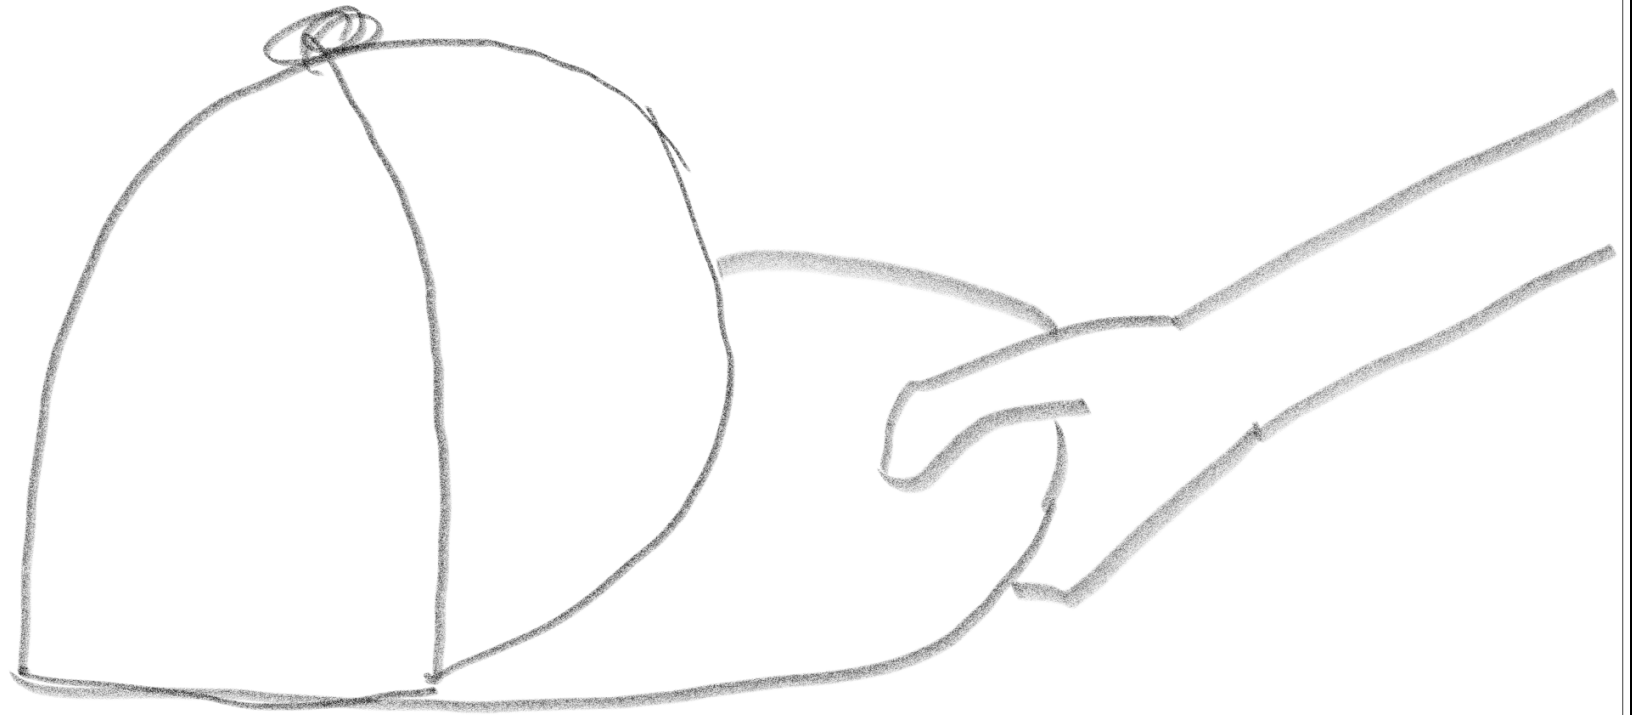

Bug: She did it! It was all her! She's responsible, I had absolutely nothing to do with it!

Manager: Oh, ok. Amazing fix on that encryption error Cookie.
The upper decks are really impressed.

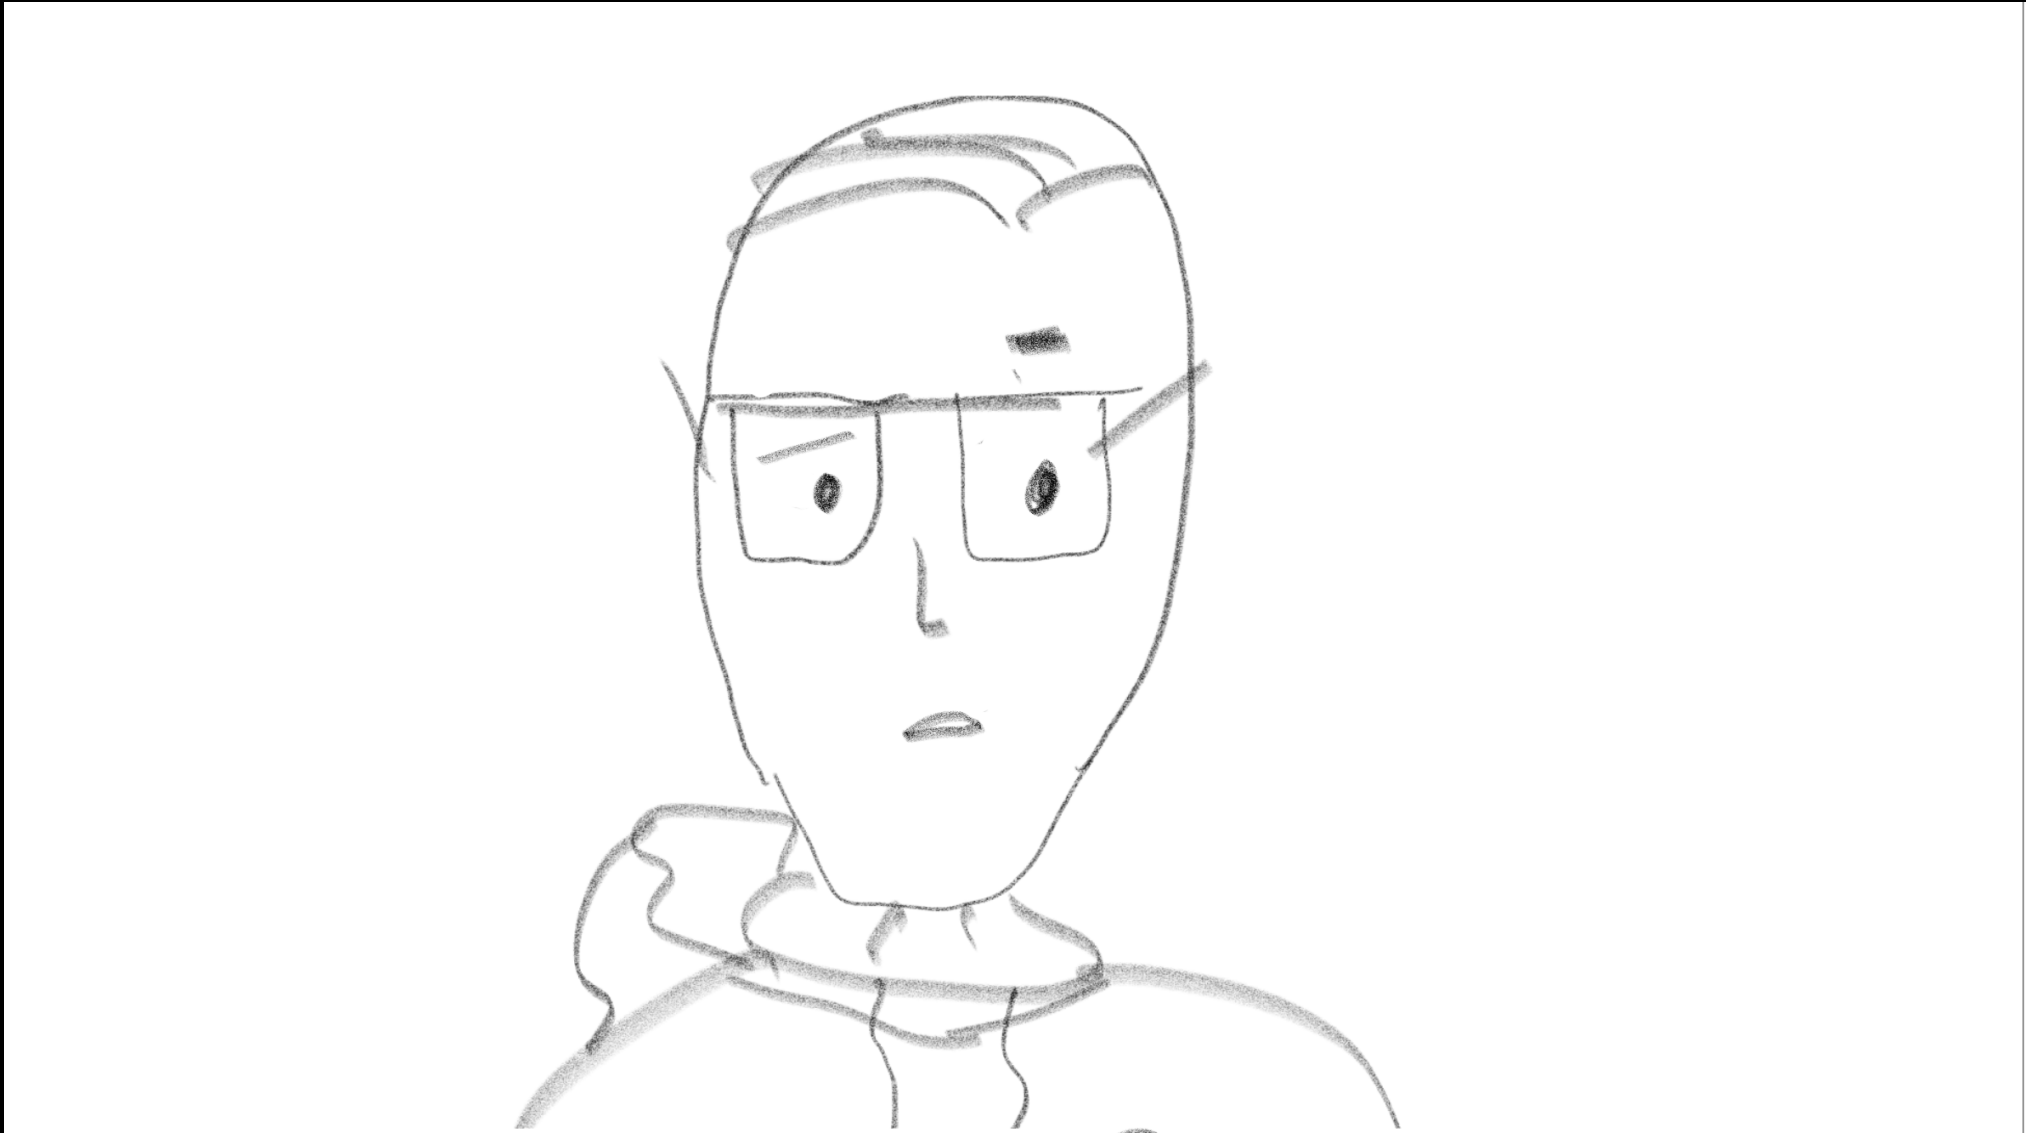

Cookie: I mean, it's not like it was that hard or anything.

Manager: Well, great job _____! Congratulations!

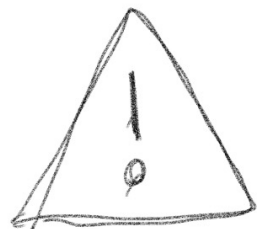

Cookie: Thanks, I _____ (turns around management slogan).

(Manager realizes the mistake)

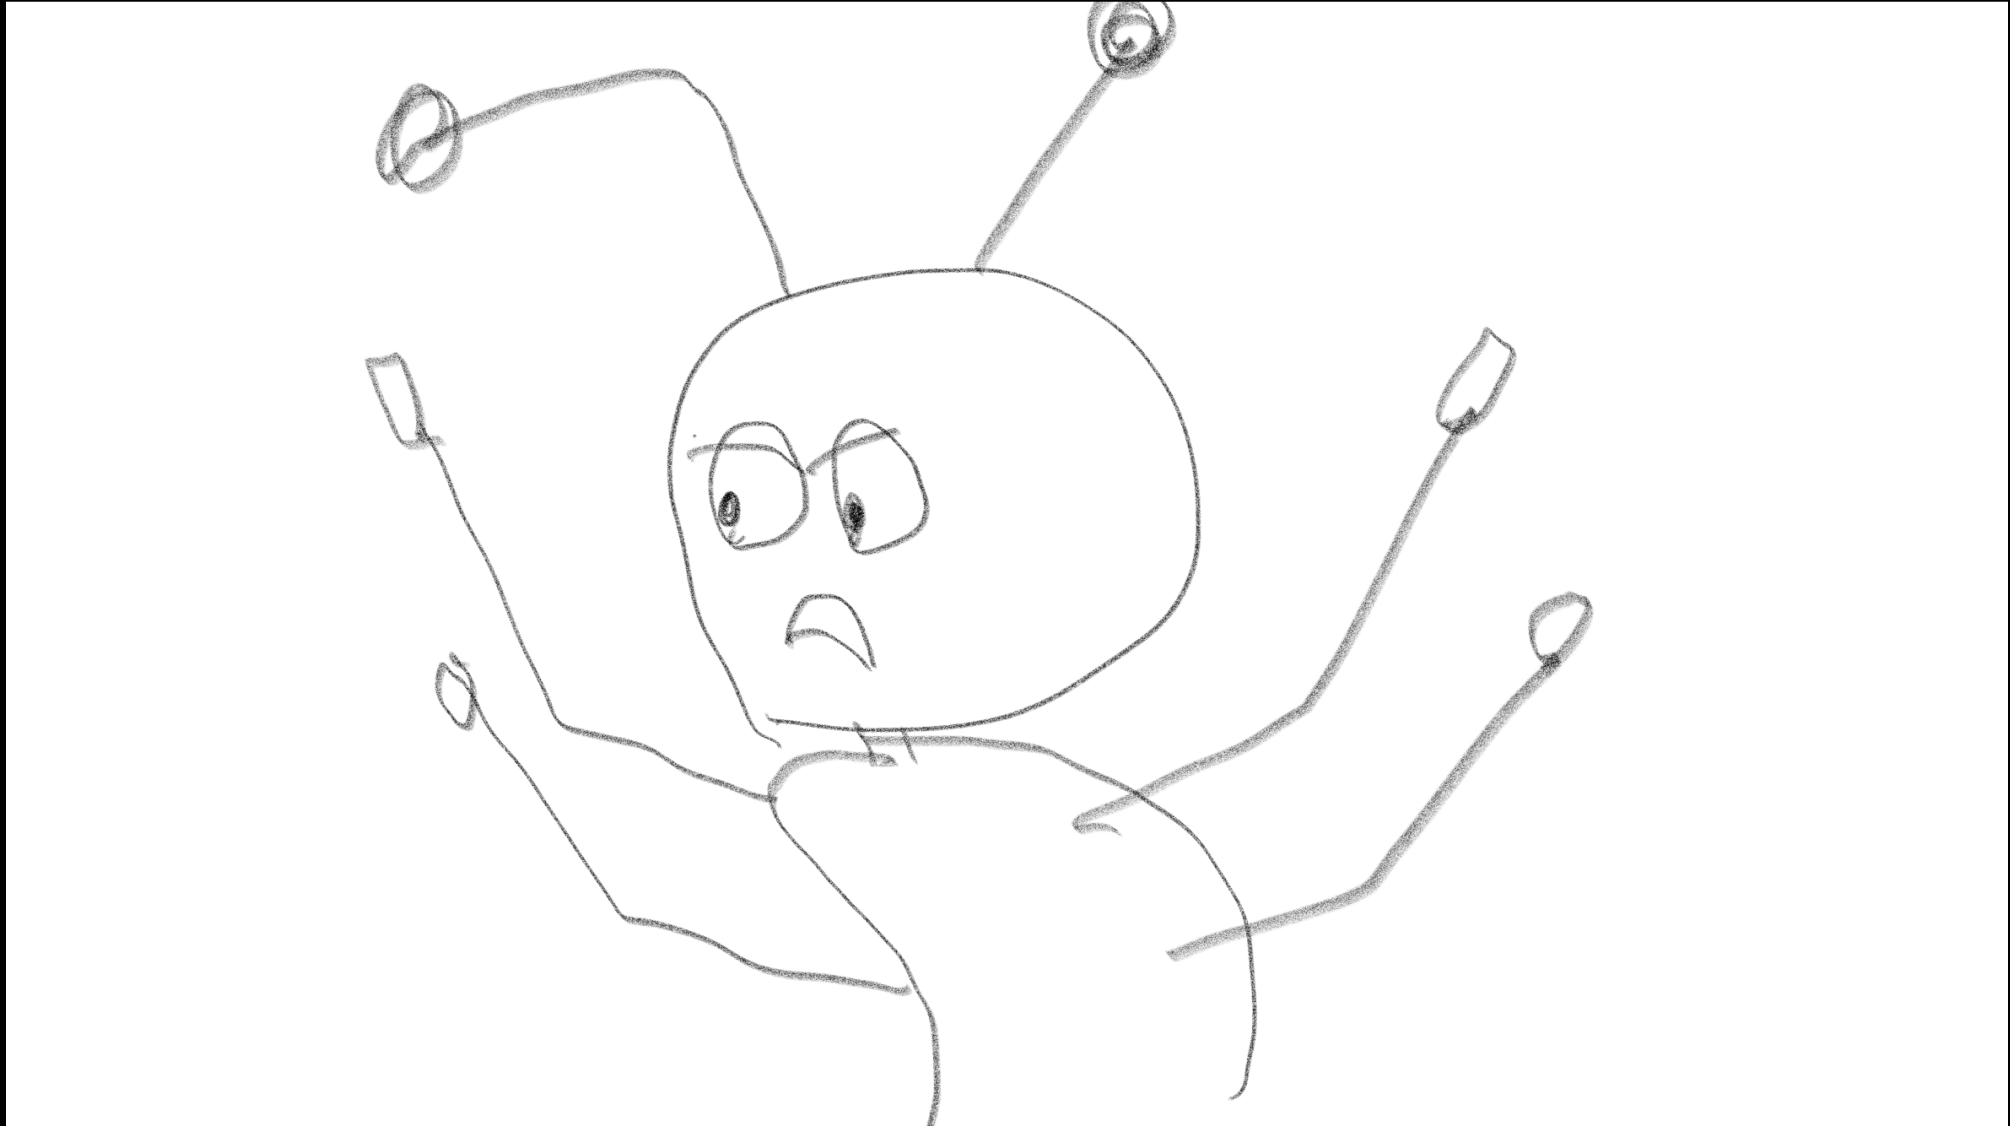

(Back to work)

Alert

Pull request denied

(Back to work)

Bug: What the heck, some security tool just denied my pull request!
